

**Exam Code:** 000-015

**Exam Name:** IBM Maximo Asset Management V7.1  
Implementation

**Vendor:** IBM

**Version:** DEMO

## **Part: A**

1: Where is E-audit enabled?

- A.Users
- B.Security Groups
- C.Application Designer
- D.Database Configuration

**Correct Answers: D**

2: A client has assigned a frequency of every three months and has three jobs to be added to the Job Plan sequence table window. The first Job Plan is for every three months, the second Job Plan is for every six months, and the third Job Plan is for the annual maintenance. What is the sequence to be set for the six month Job Plan?

- A.1
- B.2
- C.6
- D.12

**Correct Answers: B**

3: Labor is used to record time spent on a Work Order. When the labor record is created, what also must be created before or during the record creation?

- A.User
- B.Crew
- C.Person
- D.Person Group

**Correct Answers: C**

4: Which method is used to add Work Plans to a Work Order?

- A.manually create a Work Plan or assign a Job Plan
- B.manually create a Work Plan or assign a Safety Plan
- C.Work plans are created automatically via the "Move/Swap/Modify" Select Action menu item.
- D.Work plans are created automatically via the Create Job Plan from Work Plan Select Action menu item.

**Correct Answers: A**

5: Which statement about Condition Monitoring is the most accurate?

- A.Multiple monitoring points can be created against the same Asset or Location. Before creating these points, a meter of type Gauge or Characteristic must be defined.
- B.Multiple monitoring points can be created against the same Asset. The meter type of these points will be Gauge. A meter does not need to be created as this is created automatically.
- C.Multiple monitoring points can be created against the same Asset. The Asset's current location is provided as a reference. The point type needs to be specified as Gauge or Characteristic before entering other details.
- D.Multiple monitoring points can be created against the same Asset or Location. As each point is

created, a Gauge type meter for the measurements to be recorded against needs to be created. Characteristic meters are not set up in Condition Monitoring, but on the Job Plan.

**Correct Answers: A**

6: Which statement is correct?

- A.A condition code can be used on any rotating Asset.
- B.A condition code can be added to any type of Asset.
- C.A condition code can only be used on a rotating Asset when the item is condition enabled.
- D.There is no condition code on an Asset. Condition codes are only associated with items that are purchased or held in a storeroom.

**Correct Answers: C**

7: What is required to create an RFQ?

- A.only the RFQ Identifier and Priority
- B.only the RFQ Identifier, Priority, and Item Number
- C.only the RFQ Identifier, Priority, and at Least 1 Exam Code
- D.RFQ Identifier, Priority, at least 1 Exam Code, and at least 1 RFQ Line

**Correct Answers: A**

15: A shift has the following repeating pattern:

- 2 weeks day work
- 1 week night work
- 1 week off

After applying the shift to a calendar, the company gives everyone a holiday in two weeks time.

Which type of time needs to be created, then applied?

- A. Holiday
- B. Working

- C.Vacation
- D.Non-working

**Correct Answers: D**

16: Which statement is true about the Users and Custodians functionality?

A.Users and Custodians can be created for Assets. A User is someone who uses the Asset. A Custodian is someone responsible for the care of the Asset. For each person entered, the User field, the Custodian field or both must be checked. One person can be nominated as the Primary Contact for the Asset.

B.Users and Custodians can be created for Assets and Locations. A User is someone who uses the Asset or Location. A Custodian is someone responsible for the care of the Asset or Location. For each person entered, either the User field or the Custodian field or both fields must be checked. One person can be nominated as the Primary Contact for the Asset or Location.

C.User and Custodians can be created for Assets, Locations and Configuration Items (CIs). The dialog box has a table window for creating Users and Custodians and another for creating Primary Contacts who are used for communicating information about the Asset, Location or CI by email or bulletin board. A person can be a user or a custodian, or both a user and a custodian.

D.Users and Custodians can be created for Assets and Locations. A User is someone who uses the Asset. A Custodian is someone responsible for the care of the Asset. The Primary Contact is used for communicating information about the Asset or Location by email or bulletin board. These three fields act like a radio button, only one of them can be checked on each person record.

**Correct Answers: B**

17: Which three objects have rotating records? (Choose three.)

- A.Person
- B.Assets
- C.Locations
- D.Job Plans
- E.Item Master
- F.Service Items

**Correct Answers: B C E**

18: What is the purpose of E-signature?

- A.records the person that made a modification to an object
- B.records the person that made a modification to an attribute
- C.records the Security Group of the person that made a modification to an object
- D.records the Security Group of the person that made a modification to an attribute
