

Exam Code: 000-710

Exam Name: u2 unidata v5.2 administration for unix and windows admin

Vendor: IBM

Version: DEMO

Part: A

1: In addition to modifying dictionary attributes to be SQL compliant, which other important function is performed by the CONVERT.SQL command?

- A. Adds the Owner*Tablename to the SQL privilege file.
- B. Invokes the SQL GRANT command on the converted table.
- C. The process converts metacharacters "-" to "_" in the data file.
- D. The process changes record id metacharacters to legal SQL characters.

Correct Answers: A

2: Where is the connection timeout value for the Uni Call Interface (UCI) set?

- A. On the client PC in the WINNT/system32 directory.
- B. On the server in /usr/ud52/include/udtconfig file.
- C. On the server in the path/unishared/unirpc/unirpcservices file.
- D. On the client PC in the control panel - Network - Protocol - TCP/IP Protocol properties.

Correct Answers: C

3: When SQL SELECT privilege is GRANTED on a UniData Subtable accessed by an ODBC client, which action is allowed?

- A. read a record from a SQL View
- B. insert a record into a SQL View
- C. delete a record from the SQL Subtable
- D. read a record from a the SQL Subtable

Correct Answers: D

4: In addition to the server HOSTNAME or IP ADDRESS, the UCI Config Editor is used to define which connection parameter?

- A. Service
- B. DBMS Type
- C. Network Protocol
- D. Connection Timeout Value

Correct Answers: B

5: If the remote client connection to the server fails, what diagnostic procedure needs to be confirmed?

- A. The TIMEOUT value for udserver in unirpcservices file
- B. Successful ping or telnet from the client to the server
- C. The HKEY_LOCAL_MACHINE/SOFTWARE/ODBC registry entry needs
- D. The path/unishared/unirpc/unirpcservices value for uvdrsv

Correct Answers: B

6: Where are the UniData Open Database Connectivity (ODBC) drivers and dynamic link libraries (dll's) installed?

- A. On the client PC

- B. On the UNIX Server
- C. In \$UDTHOME/\$UDTBIN
- D. In \$UDTHOME/sys/CTLG

Correct Answers: A

7: Visual Schema Generator (VSG) will automatically assign a UniData file's @ID to the SQL Table as which field name?

- A. ID
- B. @ID
- C. ID1
- D. ID_1

Correct Answers: A

8: Which software package must be installed to enable a serial device access to UniData running on Microsoft Windows systems?

- A. UDSerial
- B. UDSerial and UDTelnet
- C. Third party serial server
- D. NT/2000 native serial support

Correct Answers: B

9: In which UNIX directory is the udtconfig file located on UniData release 5.x (where x is the current release number)?

- A. /usr/ud5x/include
- B. \$UDTBIN/ud5x/include
- C. \$UDTHOME/ud5x/include
- D. /usr/unidata5x/include

Correct Answers: A

10: Which UniData command recommends parameter values for 'udtconfig' and for the UNIX 'kernel'?

- A. lstt
- B. gstt
- C. sysinfo
- D. udtconf

Correct Answers: D

11: Which command is used to select a tape drive after it is defined by SETTAPE?

- A. T.ATT
- B. T.SET
- C. T.SELECT
- D. T.DEVICE

Correct Answers: A

12: Which 'udtconfig' parameter determines the number of local control tables (LCT) in the control table list (CTL)?

- A.NUSERS
- B.SHM_GNTBLS
- C.SHM_LPAGESZ
- D.SHM_LCINENTS

Correct Answers: A

13: Which ECL command displays the current language setting?

- A.LIST.LANG
- B.LIST.LANGGRP
- C.LIST.LANGDET
- D.LIST.LANGUAGE

Correct Answers: B

14: When the command ipcstat displays "unknown" on the far right of an entry for an ipc facility, this indicates processes that are associated with

- A.non-UniData processes.
- B.Shared Memory Manager (smm) processes.
- C.Recoverable File System (RFS) processes.
- D.Shared Basic Code Server (sbc) processes.

Correct Answers: A

15: Which system command displays shared memory Local Control Tables (LCT) use on UNIX?

- A.sms
- B.lstt
- C.gstt
- D.gsms

Correct Answers: B

16: Which system command displays global and local shared memory use by the 'smm' daemon?

- A.sms
- B.lstt
- C.gstt
- D.gsms

Correct Answers: A

17: Which ECL command defines the OS spooler command to be used for Unidata printing on UNIX?

- A.SETPTR
- B.SETOSLP
- C.!setptr
- D.SETOSPRINTER

Correct Answers: D

18: Which UNIX command displays a list of message queues, shared memory, and semaphores?

A.ipcrm

B.udstat

C.udipcrm

D.ipcstat

Correct Answers: D

19: Which udtconfig parameter contains the size of a shared memory segment to store globally cataloged programs?

A.SHM_PGM_SIZE

B.SHM_MAX_SIZE

C.SBCS_SHM_TBL

D.SBCS_SHM_SIZE

Correct Answers: D

20: From the ECL prompt which command displays information about users currently logged in and the number licensed for UniData?

A.WHO

B.LISTUSER

C.LIST.QUEUE

D.LIST.USERSTATS

Correct Answers: B
