

Exam Code: 000-M21

Exam Name: IBM IM Information Server Technical Sales

Mastery Test v1

Vendor: IBM

Version: DEMO

Part: A

1: How does Information Analyzer share meta data and results with the rest of Information Server?

- A. Emails are automatically sent to all Information Server users
- B. An html page is generated with analysis results
- C. Analysis results and notes from data profiling research are saved in the meta data layer of Information Server and are available for viewing in DataStage and other Information Server tools
- D. Automatic RSS publication of analysis results

Correct Answers: C

2: What is the goal of the various application Packs that exist for Information Server?

- A. Better pricing and installation options
- B. To accelerate team development
- C. To enhance of source code management
- D. To support loading/unloading and data integration with popular packaged applications such as Oracle Financials, SAP, and JD Edwards

Correct Answers: D

3: Which of the following cannot be published by WebSphere Information Services Director (WISD) as a Service?

- A. DataStage Jobs
- B. Teradata Stored Procedures
- C. Federation Queries
- D. QualityStage Jobs

Correct Answers: B

4: There are many ways to exploit the concept of re-use with DataStage/QualityStage. Which feature below describes a graphical unit of re-use that can be included in any Job?

- A. Graphical Job Sequencer
- B. Performance monitor
- C. Stage palette
- D. Shared Containers

Correct Answers: D

5: Are DataStage and QualityStage integrated at the interface, metadata, and engine levels?

- A. No. They are only integrated at runtime.
- B. Yes. They are integrated for developers at design time, at the engine for runtime, and at the meta data level for impact analysis and data lineage.
- C. No. They still have separate developer interfaces.
- D. No. They can invoke each other at run time at the engine level, but have a separate meta data model.

Correct Answers: B

6: QualityStage delivers higher match rates than other products in the industry for de-duplication and matching. What is the unique capability of QualityStage that helps QualityStage deliver these higher match rates?

- A.Statistical Pattern Counting
- B.Bit level character comparisons
- C.Probabilistic Record Linkage
- D.Phrase parsing

Correct Answers: C

7: Does DataStage have the ability to run a process across multiple machines in a GRID?

- A.No. DataStage can only be run on single SMP machines with multiple CPUs
- B.Yes. DataStage can run across a grid of homogeneous environments
- C.Yes. DataStage can run across a grid that includes Windows, Unix and mainframe processors
- D.No. DataStage only runs on one CPU

Correct Answers: B

8: Can DataStage and Information Server access mainframe (zOS) data sources such as IMS, VSAM, Model 204 and ADABAS (among others)?

- A.No. DataStage can only access local flat files.
- B.Yes. DataStage can access any remote source using all the Connectivity capabilities of Federation Server and Classic Federation, or via connections to partner offerings.
- C.No. DataStage can only read data files via ODBC.
- D.No. DataStage can only read data files via JDBC.

Correct Answers: B

9: Which is NOT a benefit of Information Analyzer?

- A.Gain insight into your data source
- B.Reduce hardware requirements
- C.Improve personnel productivity
- D.Reduce the time to profile data by 70%

Correct Answers: B

10: What function does Business Glossary NOT help enterprises achieve?

- A.Agree on common business terminology
- B.Assign data stewards to manage business terms
- C.Create a repository for ALL their corporate meta data
- D.Classify technical objects using accepted terms and definitions

Correct Answers: C
