Exam Code: LOT-825

Exam Name: IBM WebShere Portal 6 Deployment and

Administration

Vendor: IBM

Version: DEMO

Part: A

1: Composite applications can be defined by which of the following?

A.A group of applications that share a common theme

B.A list of applications available to the personalization server

C.A cluster of WebSphere Portal servers that share a common database

D.A compiled set of components that address a particular business need

Correct Answers: D

2: You are utilizing ReleaseBuilder to stage configurations between two releases. You are tracking which configuration entities were removed, added or changed compared to the previous release. Which of the following are created to detect deviations between one configuration and another?

A.Staged updates

B.Deletion updates

C.Differential updates

D.Configuration updates

Correct Answers: C

3: Members of a WebSphere Portal cluster exist on multiple physical machines to distribute the workload of a single logical WebSphere Portal image. What is this called?

A.Vertical scaling

B.Horizontal scaling

C.Multi-machine design

D.HTTP server separation

Correct Answers: B

4: Constance, a Portal user, is noticing that a portlet she utilizes takes a long time to render. Data is drawn from other portlets, some of which access remote data. Which of the following can the administrator implement to help reduce the time Constance waits for the portlet?

A.Portal clustering

B.Real-time database access

C.Parallel portlet rendering

D.Synchronous portlet transfer

Correct Answers: C

5: Your WebSphere Portal environment is supposed to access a remote LDAP directory that is supported by another group in your organization. However, they will not allow changes to be made to their LDAP directory structure. Portal has requirements that cannot be met by their structure. Which of the following is the best possible solution?

A.Do not utilize the remote LDAP directory and create a local Cloudscape directory

B.Utilize the remote LDAP directory and disable all features that require customization

C.Utilize the remote LDAP directory and create a Lookaside database for additional profile information

D.Copy the remote LDAP directory into a local LDAP source and make the necessary

customization needed to utilize the local source

Correct Answers: C

6: In planning to utilize collaboration components, the existing Quickplace server utilizes a central LDAP directory based on Lotus Domino. Both the Quickplace and the LDAP server are accessed via SSL. Which of the following is correct if you wish to enable an IBM Lotus Sametime server into the environment?

A.Sametime must utilize SSL and must point to its own local directory

B.Sametime has the option of using SSL and must point to its own local directory

C.Sametime must utilize SSL and point to the same directory that Quickplace accesses

D.Sametime has the option of using SSL and point to the same directory that Quickplace accesses

Correct Answers: C

7: Dana, a Portal user, is a member of multiple virtual portals in her company. Within the virtual portals and PAC, you have made restrictions on what is visible, including scoping resources. Which of the following Portal resources may not be controlled in this manner?

A.Portlets

B.Web modules

C.Portlet Applications

D.Composite applications

Correct Answers: D

8: Which of the following best describes the difference between horizontal cloning and vertical clustering?

A.Vertical clustering takes advantage of the resources of a multiprocessor system; horizontal cloning allows for upward scalability

B.Vertical clustering allows for users to authenticate against multiple LDAP sources; horizontal cloning allows multiple servers to act as one server

C.Horizontal cloning replicates the back-end database in real-time; vertical clustering takes advantage of multiple Websphere servers as a single cell

D.Horizontal cloning allows multiple HTTP servers to server in a failover scenario; vertical clustering allows Portal servers to combine processor and memory into one virtual server

Correct Answers: A

9: The business units of your enterprise have needs for their own portals. However, the demand on server resources is not great enough to require parallel installations. In response, your enterprise chose virtual portals. Which of the following are available across each of the virtual portals?

A.Portal search

B.Document management

C.Portal property file definitions

D.Anonymous pages per virtual portal

Correct Answers: D

10: ReleaseBuilder enables management of release configurations independent of which of the

following?
A.XML configurations
B.User configurations
C.Staged configurations
D.Generation configurations
Correct Answers: B
