

Exam Code: 000-842

Exam Name: Rational Functional Tester for Java

Vendor: IBM

Version: DEMO

Part: A

1: How do you start the application under test?

- A.use the Windows Start menu
- B.simply begin recording
- C.open a command line and start the application by typing its name
- D.click the Start Application button on the recording toolbar

Correct Answers: D

2: While recording a script, the recording monitor _____.

- A.appears at the conclusion of recording
- B.is only displayed on the toolbar
- C.does not appear
- D.displays a message for each action

Correct Answers: D

3: What can be tested when recording a verification point?

- A.an objects data only
- B.an objects data or properties only
- C.whether or not the object is working
- D.an objects data, properties, or existence

Correct Answers: D

4: What can you use to select an object as a verification point?

- A.the object finder, the object picker, or the object browser
- B.the main object browser, the test object browser, or the extra object browser
- C.the object finder, the test object browser, or the delay method
- D.the delay method, the scripting method, or the pointer method

Correct Answers: C

5: A recording is started by:

- A.Entering script_record on the command line
- B.creating a script and then pressing the record button in the RFT application
- C.starting the application under test
- D.Starting RFT

Correct Answers: B

6: How do you stop recording?

- A.click the Stop Recording button on the recording toolbar
- B.end the application under test
- C.close RFT
- D.close the recording monitor

Correct Answers: A

7: Which three actions are possible with RFT? (Choose three.)

- A.use a wizard to substitute literals with datapool variables
- B.substitute literals in verification points with datapool variables
- C.create a datapool while recording a data-driven script
- D.create scripts in c#

Correct Answers: A B C

8: You must _____ a script with a datapool before substituting literal values in the script with references to datapool variables.

- A.share
- B.associate
- C.run
- D.disassociate

Correct Answers: B

9: When is the best time to use data-driven testing?

- A.when the test only needs to be run once
- B.when the test steps change based on the test input data
- C.when the test must be run multiple times with different data
- D.when the test requires a lot of manual data entry

Correct Answers: C

10: Functional Tester allows you to import an external datapool from which of the following ? (Choose three.)

- A.an external .csv file
- B.another Functional Tester datapool
- C.an existing TestManager datapool
- D.an access (.mdb) file

Correct Answers: A B C

11: What will the following CallScript do? CallScript (myScript, null, DP_ALL)

- A.cause the script to run an infinite number of times
- B.cause the script to iterate through the entire datapool
- C.cause the script to run through 100 datapool values
- D.cause myScript to always pass

Correct Answers: B

12: What is one way to insert data-driven commands into the test script?

- A.use the Insert Data Driven Commands button while recording
- B.use the Insert Data Driven Commands button while executing
- C.the commands are generated automatically while importing the datapool
- D.use the super helper class after recording

Correct Answers: A

13: What must you do before editing the datapool using an external application?

- A. make it a public datapool
- B. make it a private datapool
- C. export it to a .csv file
- D. import it from a .csv file

Correct Answers: C

14: Which statement is true about an RFT test datapool?

- A. It is exclusive for only one test script.
- B. It is a collection of related data records.
- C. It is automatically generated during script record.
- D. It is a collection of related test scripts.

Correct Answers: B

15: What must you do to view a comparator of a failed verification point from an RFT text log?

- A. open a web browser and browse to open the file: \<project_path>\<log_name>\<log_vp_name>.rftvd for the verification point you want to view
- B. right-click on the test log and select Failed Verification Points from the right-click menu, then select the verification point you want to view
- C. open the test log, right-click on the verification point line you want to view and select View Results from the right-click menu
- D. log results in another format since you cannot open a comparator from a text log

Correct Answers: B

16: Given an existing TestManager Rational Test project, what are the steps to log results to TestManager?

- A. from TestManager, create a new Test Script Type for RFT, then from RFT, select the Functional Test logging preferences to TestManager
- B. from RFT, select the Functional Test logging preferences to TestManager, then select the TestManager project when you run an RFT test
- C. from RFT, associate the Rational Test Project with the RFT project, then select the Functional Test logging preferences to TestManager
- D. from the Rational Administrator, associate the RFT project to the Rational Test Project, then from RFT, select the Functional Test logging preferences to TestManager

Correct Answers: C

17: Out of the box, what are the different options for logging RFT tests?

- A. HTML, text, custom, TestManager, and none
- B. HTML, text, TPTP, TestManager, and none
- C. TestManager, CQTM, TPTP, HTML, and none
- D. HTML, PDF, text, TestManager, and none

Correct Answers: B

18: Not including TestManager or custom logging, how can you organize RFT test results?

- A.define and follow a naming convention for all test logs
- B.define and follow a naming convention for all logs and log subfolders
- C.create as many folders in the *_logs project as needed and drag logs into the appropriate folders
- D.create additional log projects which are associated with the primary RFT project, (for example, <project>_acceptance_logs)

Correct Answers: A

19: How do you perform image verification in a test?

- A.select Perform Image Verification Point from the Verification Point and Action Wizard
- B.select the Perform Properties Verification Point from the Verification Point and Action Wizard, then select only the .src or other property for the image
- C.download and install the RFT Enhancement Pack plug-in from IBM Rational Support
- D.download and install the Image Comparator for Rational Functional Tester 2003.06 utility from developerWorks

Correct Answers: D

20: What should the tester open to view Test Objects, Main Data Area and Recognition Data?

- A.the test script
- B.the test comparator
- C.the object map
- D.the log viewer

Correct Answers: B
