

Exam Code: 000-850

Exam Name: isries domino solution sales v5r3

Vendor: IBM

Version: DEMO

Part: A

1: A loyal IBM Lotus Domino for iSeries customer expresses concern about the future of Domino and the wisdom of continuing to use it. The customer has read several press articles and forum postings about Lotus Workplace strategy. They are wondering if they should migrate from Domino to Lotus Workplace on their iSeries now. Which of the following is the most appropriate response?

A. IBM does not plan on changing any part of the Domino architecture in the next version of Domino. The statements in the press regarding IBM's Lotus Workplace strategy and plans are accurate.

B. Lotus Workplace is a strategic IBM product family and if the customer believes it is right for their business, they can easily migrate their existing Domino 6 mail and calendar users now to Lotus Workplace 2.0 on their iSeries.

C. IBM is committed to supporting and advancing the Domino messaging and application deployment platform for years to come. Domino .NSF based applications will be preserved. When the customer is ready, they will be able to expand the collaborative capabilities of their Lotus investments by integrating them into Lotus Workplace.

D. IBM's current statement of direction is that Lotus Domino 7 is the last planned version of Lotus Domino and that customers should plan on migrating from Lotus Domino to Lotus Workplace before the end of 2006.

Correct Answers: C

2: Which of the following is a benefit of using IBM Lotus Domino replication?

A. Security protocols are not required when using replication.

B. Less disk space is required.

C. Replication supports a greater number of clients.

D. Any Domino application can be taken offline.

Correct Answers: D
