

Exam Code: 050-686

Exam Name: Foundations of Novell Networking: Netware
6.5

Vendor: NOVELL

Version: DEMO

Part: A

1: Which describes the role of the Novell Distributed Print Services (NDPS) printer agent?

- A.It downloads the correct print driver to the workstation.
- B.It responds to queries from clients about the status of a print job.
- C.It provides a platform for printer objects that reside on the server.
- D.It allows NDPS clients to sent print jobs to printers that are not NDPS-aware.
- E.It redirects print jobs to directory on the server while waiting for the printer to become available.
- F.It takes application-specific data from the application creating the print job and reformats it to work with the printer it is being sent to.

Correct Answers: B

2: You're implementing a NetWare 6.5 network for a small business client: Jessica's Bakery. There is only one server in the network. You've named the server BAKERY1 and installed it into an eDirectory tree named JESSICASBAKERY-TREE. You've used a random password generator to create a password for the tree's Admin user. To ease administration, you've located the server next to the Point of Sale system in the customer area of the bakery. You deployed Universal Password on the server. All workstations have Novell Client 4.9 installed on them. You created a NFAP share on the server for the SHARED and the FINANCE directories on the server's DATA volume. Does this configuration meet Novell's security recommendations?

- A.Yes, all Novell security guidelines have been met.
- B.No, the server should be placed in a locked closet or room.
- C.No, you shouldn't use Universal Password with Novell Client version 4.9.
- D.No, you shouldn't use the business name in the server or eDirectory tree names.
- E.No, you shouldn't create NFAP shares for directories containing financial information.
- F.No, you shouldn't use a random password generator for the Admin password. It's easy to hack.

Correct Answers: B

3: Which web-based services does Virtual Office provide? (Choose 3.)

- A.Chat
- B.Calendar
- C.Bookmarks
- D.Spreadsheet
- E.Word processor
- F.Project management charts

Correct Answers: A B C

5: You've just finished configuring an iPrint system on your NetWare 6.5 server. The server's DNS name is iprint.widget.com. The Manager object is named IPP-Printer in the SLC.WIDGET container. The Broker object is named IPP-Broker and is also in SLC.WIDGET. You've used the Maptool.htm file to configure a map named slcoffice.htm for location-based printing. What URL should you enter in your browser's Address field to test the iPrint map?

- A.http://iprint.widget.com/slcoffice.htm
- B.http://iprint.widget.com/Ipp/slcoffice.htm

- C.http://iprint.widget.com/Ippdocs/Maptool.htm
- D.http://iprint.widget.com/iPrint/slcoffice.htm
- E.http://iprint.widget.com/Ippdocs/slcoffice.htm
- F.http://iprint.widget.com/Ipp/slcoffice.htm -b=IPP-Broker.SLC.WIDGET
- G.http://iprint.widget.com/Ippdocs/slcoffice.htm -m=IPP-Printer.SLC.WIDGET

Correct Answers: E

6: Click the Exhibit button to begin.

Given the explicit right assignments shown, what rights does CGrayson have to the MHoffmann user object?

- A.Supervisor
- B.Browse
- C.Browse, Create
- D.Browse, Create, Delete
- E.Browse, Create, Delete, Rename, Inheritable
- F.Supervisor, Browse, Create, Delete, Rename
- G.Supervisor, Browse, Create, Delete, Rename, Inheritable
- H.CGrayson has no rights to the MHoffmann user object.

Correct Answers: B

7: Your company specializes in the production of digital video products. Your company has been recently awarded a very large contract that has a very short deadline. Your NetWare 6.5 server currently uses a single 80 GB IDE hard disk drive. The new contract will require considerably more hard disk storage. You've purchased and installed a 400 GB RAID5 disk array designed specifically for non-linear video editing. The array came with a diskette containing NetWare drivers. Which file on your server should you edit to load these drivers?

- A.RAID.NCF
- B.SERVER.EXE
- C.CONFIG.SYS
- D.STARTUP.NCF
- E.STARTUP.CFG
- F.STORAGE.NCF
- G.AUTOEXEC.BAT
- H.RAID5 array drivers can only be loaded manually from the server console.

Correct Answers: D

8: Which utilities can you use to manage directory and file attributes on a NetWare 6.5 server? (Choose 2.)

- A.ICE
- B.FLAG
- C.iManager
- D.iMonitor
- E.NDS Manager
- F.Remote Manager

Correct Answers: B F

9: Your company's business procedures require the use of triplicate forms. To accommodate this, you have secured an older dot-matrix printer to deploy in your network. It doesn't have a network interface. It will be connected directly to one of your server's LPT ports using an IEEE 1284 parallel cable. You use Novell Distributed Print Services (NDPS) to provide print services to your users. This printer doesn't have an embedded printer agent. Can you use it with NDPS?

- A. Yes, all prerequisite requirements have been met.
- B. No, the NDPS manager doesn't support older dot-matrix printers.
- C. No, the NDPS broker is incompatible with the IEEE 1284 standard.
- D. No, NDPS doesn't support printers that don't have an embedded printer agent.
- E. No, a printer agent can't be created for printers that connect to the server with a parallel cable.

Correct Answers: A

10: Which utility can be used to create NSS volumes in NetWare 6.5? (Choose 2.)

- A. NSSMU
- B. iMonitor
- C. NWCONFIG
- D. ConsoleOne
- E. NDS Manager
- F. NetWare Administrator

Correct Answers: A D
