

Exam Code: 060-DSFA680

Exam Name: Altiris Deployment Solution Foundation 6.8

Vendor: Altiris

Version: DEMO

Part: A

1: Which statement about deploying computer image files is true?

- A.The RDeploy switch used to preserve existing partitions is enabled by default.
- B.Aborting the deployment process (after imaging as started) corrupts the destination computer's hard drive.
- C.The maximum space required on the destination hard drive is equal to the size of the image file.
- D.The imaging process is non-destructive, and adds data to what is already stored on an existing hard drive partition.

Correct Answers: B

2: When capturing a computer's personality, the application settings used for this process are located in which file type?

- A..INI
- B..A2I
- C..ASI
- D..PBT

Correct Answers: B

3: AClient (on a managed computer) has been configured to use a multicast packet to locate the Deployment Server.

Which statement is now true?

- A.moving this computer to a different Deployment System requires the AClient agent be reconfigured
- B.images can be sent using unicast packets or multicast packets
- C.this setting configures images to be sent to the computer using multicasting technology
- D.the Deployment Server must be configured to obtain its IP address from a DHCP server

Correct Answers: B

4: Which program lets you edit image files after they have been created?

- A.ImgViewer
- B.ImageExplorer
- C.ImageEditor
- D.ImageManager
- E.ImgManager

Correct Answers: B

5: Deployment Agents (such as AClient) can be installed on remote computers using the Remote Agent Installer, but only when the remote computers are running which four operating systems? (Choose four.)

- A.Windows 2000
- B.Windows 95
- C.Windows NT
- D.Windows XP

E.Windows 2003

F.Linux

G.Windows 98

Correct Answers: A C D E

6: AClient has not been password protected.

Which three tasks can be performed after right-clicking on the AClient icon from a managed computer? (Choose three.)

A.initiate Microsoft's Sysprep Utility in preparation for imaging

B.view the AClient log file when log files have been enabled

C.change the name of the managed computer as it appears in the Deployment Console

D.change the NetBIOS name of the managed computer

E.monitor AClient's communication with the Deployment Server

F.reinstall AClient

G.edit the AClient template file

Correct Answers: B C E

7: Which utility removes the security ID (SID) before making an image of a computer?

A.SIDgenerator

B.SetupCapture

C.Sysprep

D.ImageExplorer

E.SIDconfig

Correct Answers: C

8: How does a Deployment Solution job let you work with software virtualization layers? (Choose two.)

A.layers can be imported to a managed computer

B.layers can be created

C.the state of a layer can be managed (activated, deactivated, and so forth)

D.the content of a layer can be modified

Correct Answers: A C

9: Which required symbol identifies the opening and closing of a Deployment token?

A.%

B.#

C.\$

D.*

Correct Answers: A

10: Deployment Solution's Simple Install Helper will check for and install which required third-party software? (Choose two.)

A.Java

B.DirectX

- C.ActiveX
- D..NET framework
- E.Pre-boot automation operating systems
- F.SQL

Correct Answers: D F

11: You are using the Deployment Console's New Job Wizard to migrate a computer's personality from one computer to different computer.

What happens to the names of these two computers during this process?

- A.The destination computer is automatically given a new unique name.
- B.The source computer is automatically renamed and the destination computer gets the original name of the source computer.
- C.The two computers will end up with identical names, therefore you must rename one of the computers manually.

Correct Answers: B

12: When using Altiris PXE servers in a Deployment System, which PXE statement is true?

- A.Multiple PXE servers can only be installed if a router separates them.
- B.If a PXE server is configured to delay its response, it will respond only if no other PXE server responds immediately.
- C.A managed computer only uses the first PXE server it hears from.
- D.Configuring multiple PXE servers to respond immediately causes errors on the managed computers.

Correct Answers: C

13: While imaging computers, Deployment Solution supports the use of UNDI drivers.

Which UNDI driver statements are true? (Choose two.)

- A.UNDI drivers are written specifically to work with the Altiris automation process.
- B.UNDI drivers must be downloaded and installed from Intel's Web site before they can be used.
- C.UNDI drivers let you image computers without obtaining a specific manufacturer's network driver for each network card.
- D.UNDI drivers do not support multicasting of hard disk images across the entire network.
- E.UNDI drivers support multicasting of hard disk images across the entire network.

Correct Answers: C D

14: When using the DOS operating system, image files with an .EXE file extension _____?

- A.cannot be deployed using a Deployment job
- B.must be converted to .IMG before they can be deployed with a Deployment job
- C.cannot be converted to .IMG files
- D.can be deployed without using additional Altiris imaging software

Correct Answers: D

15: You have deployed a hardware independent image to an ACPI Uniprocessor computer and

now the computer will not start.

What is the probable cause?

A.the wrong hardware abstraction layer (HAL) was deployed

B.Sysprep was not run on the source computer

C.the ACPI Uniprocessor computer does not support hardware independent images

D.a clean Windows installation was not performed on the source computer before creating the hardware independent image.

Correct Answers: A
