Exam Code: 190-702

Exam Name: IBM Lotus Notes Domino 7 System

Administration Update

Vendor: Lotus

Version: DEMO

Part: A

1: There is only one subtype for DDM server probes. What function does that probe provide?

A.Monitors agents for failures

B.Monitors NRPC traffic for failure

C.Monitors administration requests for failures

D.Monitors the Domino server core task for failure

Correct Answers: C

2: Mike, the Domino administrator, has configured Rooms & Resources across a cluster. When multiple replicas of the resource database exist in the cluster, where is processing handled if all the servers are available?

A.The user's home server

B.The resource's home server

C.The first cluster server available

D.The server closest to the physical location of the resource

Correct Answers: B

3: Cherelle, the Domino administrator, is launching Server Health Monitoring for the first time. What tasks are monitored by default for each server?

A.HTTP, SMTP, AdminP and the Amgr

B.The core server task, HTTP, SMTP and AdminP

C.No tasks until the administrator configures the monitoring for each server

D.All tasks currently running when the Server Health Monitor is first launched

Correct Answers: D

4: Enrique, the Domino administrator has created a response file for a silent server installation. What parameter must be run on the server to utilize this response file?

A.setup.exe -silent -options c:\temp\install.txt

B.nsetup.exe -silent -options c:\temp\install.txt

C.setup.exe -response -options c:\temp\install.txt

D.silent.exe -response -options c:\temp\install.txt

Correct Answers: A

5: The Domino Console connects to the Controller over what default port?

A.80

B.1352

C.1533

D.2050

Correct Answers: D

6: A collection hierarchy synchronizes data to a central server using what Domino capability?

A.Email

B.Clustering

C.Selective replication

D.The server task DDMSync

Correct Answers: C

7: You must create a DDM collection hierarchy to initiate which of the following?

A.Data roll-up

B.Probe initiation

C.Probe interface

D.Data interface

Correct Answers: A

8: Domino Domain Monitoring (DDM) enhanced events may contain events from one of the following?

A.Events generated by a Domino event generator

B.Events that are reported to the Domino server console

C.Events that occur on the local Domino Administrator client

D.Events not generated by agents or that do not apply to databases

Correct Answers: A

9: You wish to resolve an issue without user intervention based on a received event in DDM. Which handler notification method provides this functionality?

A.Pager

B.Broadcast

C.Run an Agent

D.Log to Database

Correct Answers: C

10: Cherease has noticed that a server has been rated Warning in the Health Monitoring reports. What index value must be met for a server to be rated Warning?

A.Greater than the rules algorithm

B.Greater than the Warning threshold

C.Greater than the Critical threshold

D.Greater than the assessment algorithm

Correct Answers: B

11: Smart Upgrade failover utilizes what search order?

A.By document link in the Notes client

B.By server name and hard-coded path to the Smart Upgrade database

C.By database replica ID and database name in the home server cluster

D.By notes.ini variable on the client listing all servers in the domain which the Smart Upgrade database may be found

Correct Answers: C

12: If the Fault Analyzer task locates duplicate fault reports, which is the next step the task will

take?

A.The new crash will be reported as a response to the original crash

B.The new crash will not be reported because it matches a previous fault reported

C.The new crash will be reported as a new document and a doclink will be created to the original

D.The new crash will be reported as a new document and no reference to matching documents will be created

Correct Answers: A

13: Todd is configuring a DDM Messaging probe to test Delivery Status Notifications. What must the remote mail system support for these probes to function correctly?

A.The .nsd extension

B.The .ddm extension

C.The .dsn extension

D.The .smtp extension

Correct Answers: C

14: A Domino Domain Monitoring (DDM) probe is defined as which of the following?

A.A specially-designated collection server

B.A server task loaded on each server that checks services, agents and databases

C.A discrete check configured to run against one or more servers, databases, and services

D.A client that is configured to query servers for Domino services, running agents and failed AdminP processes

Correct Answers: C

15: In the desktop policy settings document, how are client lock-down settings applied?

A.Per tab

B.Per date

C.Per field

D.Per version

Correct Answers: A

16: Automatic Diagnostic Collection stores reports in Fault Report documents. In what database are these documents stored?

A.DDM.nsf

B.Reports.nsf

C.In the log.nsf of each server

D.A mail-in database defined by the administrator

Correct Answers: D

17: The Domino administrator has enabled AutoSave for all users. Where are AutoSave documents stored?

A.To a user's local database

B.To a user's mail database located on the server

C.To an administrator defined server database per user

D.To an administrator defined central repository database

Correct Answers: A

18: Replication on selected servers and databases is monitored in DDM according to the schedule specified in what document?

A.Probe

B.Server

C.Connection

D.Configuration

Correct Answers: A

19: Shawn has modified a DDM probe document. What must be performed for this probe change to become active immediately?

A.Run the console command "reload probes"

B.Run the console command "restart probes"

C.Do nothing as modified probe documents take effect immediately

D.Probes are automatically reloaded based on the configuration time specified in DDM.nsf

Correct Answers: C

20: The Domino administrator is attempting to verify that IMAP requests are being processed correctly. Which probe should be created to monitor those types of requests?

A.SMTP Process State

B.POP3 Process State

C.Message access TCP Port Health

D.Message retrieval TCP Port Health

Correct Answers: D
