

Exam Code: 190-848

Exam Name: IBM Lotus Notes Domino 8: Building the
Infrastructure

Vendor: Lotus

Version: DEMO

Part: A

1: Thomas has moved the container for the DB2 database group titled HRApp7 to a new disk volume on the Unix server. Which of the following steps must be performed in Domino for users to maintain access to the DB2 data store?

- A.The users must remove and re-add the databases to their bookmarks
- B.The administrator must update all the view indexes of the DB2 containers
- C.The reconciliation tool must be run to update any links in the DB2 containers
- D.The new containers must be enabled for transaction logging and the new logs completed before users can access the container

Correct Answers: C

2: What is the name of the shared resource that lets you define a DB2 view of Notes data?

- A.DB2 Access view (DAV)
- B.Notes Access view (NAV)
- C.Lotus Access View (LAV)
- D.Domino Object view (DOV)

Correct Answers: A

3: The Domino administrator has locked a DB2 group. He then manually deletes five DB2 enabled databases from the Domino server in that group. Which of the following statements is true in this scenario?

- A.He may now add five databases to the group.
- B.The group may not have more databases added.
- C.He must compact the Domino server to defragment the DB2 group.
- D.He may now add five databases to the group if their total size does not exceed the size of databases removed.

Correct Answers: B

4: What are the two types of DDM Web probes?

- A.Uptime and Failure
- B.Logging and Failure
- C.Performance and Enabled
- D.Best Practices and Configuration

Correct Answers: D

5: You wish to resolve an issue without user intervention based on a received event in DDM. Which handler notification method provides this functionality?

- A.Pager
- B.Broadcast
- C.Run an Agent
- D.Log to Database

Correct Answers: C

6: Due to space considerations on her Domino server, Anissa has had to locate new databases under a folder not in the Domino data directory. Instead she has placed them on the F drive. Which one of the following should Anissa use to make these databases accessible to the users?

- A.Database Link
- B.Directory Link
- C.Profile Document
- D.File Protection Document

Correct Answers: B

7: A DDM application probe performs which of the following?

- A.Checks Web settings
- B.Probes agent schedules
- C.Checks server replication
- D.Probes database operations

Correct Answers: B

8: You have noticed that the mail-in database that stores server diagnostic information is growing large. It is possible to limit messages for automatic diagnostic data collection by adjusting what setting?

- A.Diagnostic file patterns
- B.Maximum size of diagnostic message including attachments (in MB)
- C.Minimum size of collection message including attachments (in MB)
- D.The name of the mail-in database used for receiving automatic diagnostic data

Correct Answers: B

9: Which of the following ports uses the server document for binding while the rest require entries in the notes.ini file?

- A.ICM
- B.HTTP
- C.SMTP
- D.LDAP

Correct Answers: B

10: Latrice set up domain searching. Which one of the following is referenced when a domain search is made?

- A.Domain Catalog
- B.Database Catalog
- C.Domino Directory
- D.Directory Assistance

Correct Answers: A

11: Directory assistance in Lotus Domino 8 enables you to specify when a secondary directory must only be used for authentication. This provides which of the following features?

- A.This blocks email from being forwarded to adjacent domains.

- B.This avoids NAMELookups to reduce the number of ambiguous Name dialog boxes.
- C.This help you validate your choice of host name for receiving authentication requests.
- D.This scans group member lists to ensure that each member exists in an available directory that is configured in directory assistance.

Correct Answers: B

12: Each time David restarts the agent manager, certain agents that should only run once are running unscheduled. Which of the following steps may he perform to alleviate the issue while still allowing the agents to run as required?

- A.Set the agents to run on server restart only.
- B.Remove the server name from the agent security tab.
- C.Set the agent manager not to start by removing it from the notes.ini server tasks line.
- D.Make copies of the necessary agents into a new database and move that database out of the data directory until necessary.

Correct Answers: A

13: A special type of application probe for DDM always runs and requires no configuration. Which of the following are monitored by this probe?

- A.Agent security rights
- B.Disabled agents for the compact task
- C.Agents that terminate abnormally when the maximum time to run is exceeded
- D.SQL query operations performed on databases that are not full-text indexed

Correct Answers: C

14: Domino Domain Monitoring (DDM) enhanced events contains which of the following?

- A.Specific target information only
- B.Events generated by an event probe only
- C.Events generated by an event generator only
- D.All of the above

Correct Answers: D

15: You have elected to create a marker so clients can update their reference to a database called MARKETING.NSF. You did not select a designated destination server. Which of the following is the result of this action?

- A.The client will remove the bookmark reference for the database.
- B.The client will search all servers in the domain for a replica of the database and modify the bookmark.
- C.The client will search all known cluster servers only for a replica of the database and modify the bookmark.
- D.The client will prompt the user to specify servers to search for a replica of the database and modify the bookmark.

Correct Answers: A

16: Which task in a Domino cluster checks for availability of other servers in the cluster?

- A.Cluster Manager
- B.Cluster Updater
- C.Cluster Operator
- D.Cluster Load Balancer

Correct Answers: A

17: If the Fault Analyzer task locates duplicate fault reports, what is the next step the task will take?

- A.The new crash is reported as a response to the original crash
- B.The new crash is not reported due to it matching a previous fault reported
- C.The new crash is reported as a new document but a doclink is created to the original
- D.The new crash is reported as a new document and no reference to matching documents can be created

Correct Answers: A

18: Jose set up Web authentication using primary and secondary directories. Which one of the following describes the order in which he set up directories to be searched?

- A.Domino primary directory, then Domino secondary directories. This is the only option available.
- B.Domino primary directory, then either Domino or LDAP secondary directories. The administrator can specify the order of secondary searches.
- C.LDAP primary directory, then LDAP secondary directory, and then Domino secondary directories. This is the order in which secondary searches must be made.
- D.Domino primary directory, then Domino secondary directory, and then LDAP secondary directories. This is the order in which secondary searches must be made.

Correct Answers: B

19: Mike, the Domino administrator, has configured Rooms and Resources across a cluster. When multiple replicas of the resource database exist in the cluster, where is processing handled if all the servers are available?

- A.The user's home server
- B.The resource's home server
- C.The first cluster server available
- D.The server closest to the physical location of the resource

Correct Answers: B

20: The collected probe results in a DDM Collection Hierarchy database are replicated when which of the following occurs?

- A.A collection server initiates a push replication with a spoke server.
- B.A collection server is notified about the change in an event state on a monitored server.
- C.A collection server receives the console command 'probe xxx' where xxx is a remote server.
- D.A collection server obtains a SMTP message in the ddm.nsf database notifying it to pull new events.

Correct Answers: B
