

Vendor: Oracle

Exam Code: 1Z0-102

Exam Name: Oracle Weblogic Server 11g: System
Administration I

Version: DEMO

1. Which two statements are true about Java EE shared libraries?

- A. A shared library cannot be deployed to a cluster.
- B. An application that is targeted to server1 can use a shared library that is targeted to server 2.
- C. Multiple versions of the same shared library can be deployed and be active at the same time
- D. A shared library is referenced through an application's deployment descriptor.

Answer: D

2. Refer to the Exhibit.

You use the Start button in the administration console to start managed2 successfully. Which two statements must be true?

- A. Managed2 is part of a cluster.
- B. The Administration Server is running.
- C. Managed2 has applications deployed to it.
- D. The Node Manager for machine2 is configured and running.
- E. The Node Manager for the Administration Server machine is configured and running.

Answer: C

3. Within your data center, the Administration and Managed Servers utilize a shared, central storage device, which servers access via NFS.

In this scenario, your application files no longer need to be copied to servers across the network. Which server attribute allows you to override this behavior?

- A. Startup Mode
- B. Staging Mode
- C. Root Directory
- D. Listen Address

Answer: B

4. An EJB is targeted to a cluster. Remote EJB clients can therefore take advantage of WebLogic Server's load balancing and failover capabilities.

However, a proxy server exists between the clients and cluster, which performs IP address translation.

Which cluster attribute should you modify to ensure that load balancing and failover work correctly?

- A. Multicast Address

- B. Persistent Store
- C. Cluster Address
- D. Migration Basis
- E. Replication Channel

Answer: B

5. You run the default startmanageWeblogic (.cmd in Windows) script as shown here:
startmanageWeblogic.sh server1 http://192.168.1.102:8001.

What does this do?

- A. It starts the administration server named server1, which is running at 192.168.1.102.8001.
- B. It starts the managed server named server1, which is running at 192.168.1.102.8001.
- C. It starts the managed server named server1 whose Node Manager is running at 192.168.1.102.8001.
- D. It starts the Managed Server named server1 whose Administration Server is running at 192.168.1.102:8001.

Answer: C

6. An application requires a JDBC data source, which you create in the domain. You name it but the administrator allot another domain name the same data source DatasourceB. Without modifying either domain, which is the best method to ensure that the application deploys successfully in both?

- A. Create a separate application archive to use with each domain.
- B. Create a separate deployment plan file to use with each domain.
- C. Create and register a custom deployment listener.
- D. Modify the application code to determine the current domain.

Answer: B

7. Identify three options for Keystores In a server's configuration.

- A. Demo Identity and Demo Trust
- B. Demo Identity and Java Standard Trust
- C. Java Standard Identity and Custom Trust
- D. Custom Identity and Demo Trust
- E. Custom Identity and Custom Trust
- F. Custom Identity and Command Line Trust

Answer: A,C,E

8. When installing Oracle Weblogic Server 11g with the graphical installer, which three statements are true?

- A. You must choose either a typical or a custom installation.
- B. You install under Microsoft Windows because the graphical installer is available only for Window
- C. You may create a new middleware home directory or choose an existing one.
- D. You must register for critical security updates.

E. You may install a JDK or choose one that was previously installed.

Answer: A,D,E

9.Each domain has a directory called servers that contains subdirectories for each server in the domain.

Your domain has a managed server named managed1 . When will the managed1 directory be created?

A. When the managed1 server is defined in the configuration Wizard

B. When the domain is created

C. When the administration server comes up for the first time

D. When the managed1 server1 comes for the first time

Answer: B

10. Identify three properties required by the domain Configuration Wizard when creating a new domain.

A. machine name

B. Managed Server name

C. domain startup mode

D. domain name

E. administrator username and password

Answer: B,C,E
