

**Vendor:** Cisco

**Exam Code:** 646-364

**Exam Name:** Cisco Express Foundation for Account  
Managers (CXFA)

**Version:** DEMO

1. how does network integration help businesses keep pace with changing network demands?

- A addition of strict firewalls
- B limiting internet access
- C intelligence on foundation network devices
- D increased use of network services

**Answer:C**

2. routers can be used to integrate a variety of services, which two common services are often specified by businesses?(choose two)

- A mitigation and response
- B fibre channel over ethernet
- C ip communications
- D data center virtualization
- E vpn security

**Answer:CE**

3. which series of cisco routers is suitable for small businesses and for connecting small offices to enterprise networks?

- A cisco 800 series routers
- B cisco 830 series routers
- C cisco 1700 series modular access routers
- D cisco 3700 series multiservice access routers

**Answer:A**

4. what are two security features of the cisco secure router 500 series?(choose two)

- A cisco intrusion prevention system
- B cisco IOS software firewall
- C cisco IOS easy VPN
- D Cisco unified wireless networking
- E cisco ASA hardware firewall

**Answer:AB**

5. which two series of cisco catalyst switches, when placed in the distribution layer, effectively pass high amounts of network traffic between the core and access layers while aggregation access switches?(choose two)

- A cisco catalyst 2800
- B cisco catalyst 3550
- C cisco catalyst 3750
- D cisco catalyst 4500
- E cisco catalyst 6500

**Answer:DE**

6. which of the following is less vulnerable to threats and attacks because it is not associated with one specific operating system?

- A CISCO voice and video over VPN
- B cisco secure access control server
- C cisco NAC appliance
- D cisco threat response

**Answer:C**

7. Which statement best describes the differences between Cisco SMARTnet and Cisco SMARTnet Onsite?

- A Cisco SMARTnet Onsite includes all of the elements of Cisco SMARTnet, with the additional provision of an onsite technician to perform parts replacement
- B Cisco SMARTnet Onsite is primarily attractive to customers who do not need to replace their hardware immediately, but would still like an onsite technician to install and replace hardware
- C Cisco SMARTnet Onsite includes certification classes and live network consulting at the customer site
- D Cisco SMARTnet Onsite provides network monitoring for small-to-medium sized business and provides onsite technical resources when hardware problems are detected

**Answer:A**

8. What host-based IPS solution provides threat-protection capabilities for server and desktop computing systems?

- A Cisco IPS AIM
- B Cisco IOS IPS
- C Cisco IPS NME
- D Cisco Security Agent
- E Cisco IDSM-2

**Answer:D**

9. The Cisco Unified Wireless Network minimizes the TCO and maximizes wireless network uptime by optimizing which two deployment, management, and security features? (choose two)

- A unified wireless and wired infrastructure for a single point of control for all WLAN traffic
- B simplified management of central or remotely located access points
- C extension features to wired network services, such as denial of service prevention and ACLs
- D threat defense with a robust wired IDS

**Answer:A**

10. Choose the most accurate statement regarding the account qualification and planning service component in the prepare phase

- A providing a partner with information regarding customer acceptance of a new solution
- B providing information regarding current network infrastructure readiness

C using stakeholder interviews to identify stakeholders and decision-makers, high-level solution requirements , timelines, and the scope of an opportunity

D adjusting a solution to account for a customer s physical site characteristics

**Answer:C**
