

Exam Code: E22-310

Exam Name: DiskXtender for Windows Exam

Vendor: EMC

Version: DEMO

Part: A

1: The Legal Department determined that all copies of a particular PDF must be deleted from the enterprise. Three copies were discovered on a file server with DiskXtender retention applied and written to a Governance Edition EMC Centera. Retention will expire in 18 months. How can the file be deleted even though retention has not expired?

- A. An EMC Centera administrator can select the files for deletion.
- B. Privileged delete can be used if delete rights are granted to the access profile used by DiskXtender to access EMC Centera.
- C. The DiskXtender administrator can create a delete rule for these specific files.
- D. The user needs to have deletion credentials in the DxUsers group.

Correct Answers: B

2: Which groups are created during DiskXtender File System Manager installation?

- A. DiskXtenderAdministrators, DiskXtenderSecurityAdmins, DiskXtenderUsers
- B. DxAdministrators, DxSecurityAdmins, DxUsers
- C. DxAdministrators, DxSecurityAdmins, MsAdministrators, MsSecurityAdmins
- D. DxAdministrators, MsAdministrators

Correct Answers: B

3: Click the Exhibit button.

As displayed in the exhibit, a File System Manager configuration has two media groups, Centera and NAS. Two move rules are configured, one for each media group, and listed in the order displayed in the exhibit.

If the file Medical.GIF qualifies for a move, to which media will the file be migrated?

- A.Both EMC Centera and NAS
- B.EMC Centera media only
- C.NAS media only
- D.Neither

Correct Answers: C

4: Index and search is installed and configured. The extended drive was successfully indexed after installation. Searches were also successful. Now when they search for new files added to the extended drive, the searches are unsuccessful. What do they need to do to successfully search for the new files?

- A.Check file permissions
- B.Run a drive scan
- C.Run a prefetch
- D.Run indexing

Correct Answers: D

5: DiskXtender is configured for multi-target migration with three target media. The target media are listed in the following order in the File System Manager interface:

- EMC Centera
- NAS
- Tape

What will happen to a fetch operation if EMC Centera is offline?

- A.The fetch operation fails.
- B.The file will be fetched from tape.
- C.The request will be processed using the NAS media.
- D.The request will be queued until EMC Centera comes online.

Correct Answers: C

6: A customer is implementing DiskXtender in a four-node active-active Microsoft Cluster. Where is DiskXtender installed?

- A.DiskXtender will automatically select which node to install
- B.Each physical node in the cluster
- C.Each virtual server and physical node in the cluster
- D.Virtual server on each node in the cluster

Correct Answers: D

7: A company needs to be able to analyze file deletions on its EMC Centera. What can be configured on the DiskXtender server to assist in this analysis?

- A.Audited delete
- B.Privileged delete
- C.Reclaimed delete
- D.Synchronous delete

Correct Answers: A

8: The Murphy Media company is using DiskXtender to move files from one extended drive to a second extended drive and then to tape. This is an example of which NAS media type?

- A.Aggregate NAS
- B.Multi-target NAS
- C.Retained NAS
- D.Standard NAS

Correct Answers: A

9: You want to enable direct read for the files in all of the media folders on the extended drive. Which direct read option accomplishes this in one step?

- A.The extended drive option
- B.The media finalization option
- C.The move rule option
- D.The purge rule option

Correct Answers: A

10: A DiskXtender administrator has been asked to archive and purge all PDF files larger than 1 MB in size in their environment. At which level should the rules be created to successfully archive and purge the files?

- A.Extended drive level
- B.Folder level
- C.Individual file level

D.User level

Correct Answers: B

11: A corporation recently added EMC Centera to its environment, and added an EMC Centera media type to a multi-target media group. Files are retrieved from NAS-media using the direct read option, and the purge immediately option is also enabled in the move rule. According to best practices what else should be changed?

A.No changes are necessary.

B.The EMC Centera media service needs to be first in the list.

C.The direct read option should be disabled in the move rule.

D.The purge immediately option should be disabled in the move rule.

Correct Answers: C

12: A company ran out of space on the drive and can no longer fetch files. It has move rules that purge files on move. The move rule has no age delay. What should be done to free up space on the extended drive?

A.Create a move rule with an age delay and run background scans

B.Create a purge rule and run background scans

C.Create an index rule to clear space on the extended drive

D.Set tracing on moves and purges

Correct Answers: B

13: Which rules always take precedence?

A.Exclusion rules

B.Inclusion rules

C.Index rules

D.Rules that are listed first in the DiskXtender administrator interface

Correct Answers: A

14: You perform a legal discovery search. The search results do not include one of the files on the extended drive that you expect to be returned. How do you determine whether the file was indexed?

A.Look in the DiskXtender Event Viewer

B.Look in the Index Transaction Log

C.Run an extended drive report

D.Use the Explorer Add-ons to check the file properties

Correct Answers: D

15: A company has 15 DiskXtender servers and would like to use the DiskXtender Search Module. What is the minimum number of Index and Search Engine servers required?

A.1

B.2

C.3

D.5

Correct Answers: B
