

Exam Code: HP0-P16

Exam Name: Planning & Design of HP 9000/HP Integrity
Server Solutions

Vendor: HP

Version: DEMO

Part: A

1: Which advantages of HP Integrity servers can you propose to a potential customer running IBM POWER4 servers? (Select two.)

A.IBM supports only Linux operating systems.

B. HP is the only vendor that provides partitioning technology.

C. HP Integrity servers can mix processor types on a cell board.

D. A hardware swap is required to migrate from IBM POWER4 to POWER5.

E. HP Integrity offers a better price-to-performance ratio based on SAP SD benchmark data.

Correct Answers: D E

2: When using the HP Performance Quick Reference Tool (PQRT) to find a corresponding server for a competitive offer, which numeric fields do you compare?

A. TPC-B

B. number of CPUs

C. delta performance

D. estimated performance

Correct Answers: D

3: What are advantages of HP partitioning over IBM LPAR partitioning? (Select two.)

A. HP offers two kinds partitions: nPar and vPar.

B. HP vPar partitions offer full electrical isolation.

C. HP nPar partitions offer full electrical isolation.

D. HP partitions offer the same functionality as IBM LPARS.

E. HP nPars enable dynamic processor reallocation to another nPar.

Correct Answers: A C

4: Considering the advantages of using HP Integrity servers for online transaction processing (OLTP) environments, what type of business would benefit the most from using this hardware platform?

A. a data warehouse

B. a bank with automatic teller machines

C. an architectural firm with a large database of digital drawings

D. a library that maintains a catalog of historic records for online viewing

Correct Answers: B

5: Your task is to prepare a document that focuses on the competitive positioning of HP Integrity servers against other vendors for Linux. Which competitive concept should be included in your document?

A. HP delivers proprietary technology and complete solutions for Linux.

B. HP delivers industry-standard platforms and limited solutions for Linux.

C. HP delivers industry-standard platforms and complete solutions for Linux.

D. HP delivers proprietary technology that results in lower total cost of ownership (TCO).

Correct Answers: C

6: When talking to your client about migrating to HP Integrity rx8640 servers, what benefits should you discuss? (Select two.)

- A. HP Integrity partitions can be physical and virtual.
- B. Integrity servers use 64-bit processor technology.
- C. PA-RISC and Itanium cell boards can be mixed in the same complex.
- D. The HP Integrity rx8640 server supports up to eight cell boards in the server.
- E. Cell boards with different processor speeds can be mixed in the same partition.

Correct Answers: A B

7: A customer is hesitant to invest in HP Integrity servers because an IBM representative told him that the Itanium 2 processor will go out of production due to low independent software vendor (ISV) support. Which responses are correct for this concern? (Select two.)

- A. More than 7000 ISVs are developing software for the Itanium 2 processor and the number is growing.
- B. HP Integrity Virtual Machine will enable the customer to run any x86 application without performance loss.
- C. The roadmap for HP Integrity servers indicates that future processor developments will be included in the customer's business plans.
- D. Even though there are only 7000 ISVs developing software to run on Itanium 2 processors, they cover every needed type of application.

Correct Answers: A C

8: What differentiates HP Integrity servers from other vendors' Itanium-based systems?

- A. chipsets
- B. full redundancy
- C. faster clock speeds
- D. memory expandability

Correct Answers: A

9: Your customer performs a network-based backup of HP-UX servers over a Gigabit Ethernet LAN to save their data to a library. Which technology will improve performance?

- A. NIC bonding
- B. NIC teaming
- C. Auto Port Aggregation (APA)
- D. Advanced Technology Attachment

Correct Answers: C

10: What differentiates the HP Integrity platform from the IBM pSeries?

- A. HP Integrity does not run Linux.
- B. IBM pSeries does not run Linux.
- C. HP Integrity does not run Windows.
- D. IBM pSeries does not run Windows.

Correct Answers: D
