- A.Replication
- B.DB2 group locking
- C.ACLs and reader lists
- D.DB2 container storage

**Correct Answers: C**

4: You want to restrict simple search to enhance server performance by preventing users from searching databases on a server that do not have full-text search enabled. In which of the following locations is this configured?

- A.The server document
- B.The server notes.ini
- C.The server configuration document
- D.The advanced properties of each database

**Correct Answers: D**

5: Satchel, the Domino administrator, is attempting to implement design note compression on the resource database. He is unable, though, to see the property selection to enable this feature. Which of the following is preventing him from seeing this selection in the database properties box?

- A.He is not manager of the database
- B.He has not deferred index creation
- C.He has not enabled the new Domino 8 ODS
- D.He does not have the designer client installed on his workstation

**Correct Answers: C**

6: Martin has been directed to configure Sametime integration for Domino Web Access (DWA) on the Domino 8 server. Which of the following is required in the server document for Sametime to function correctly inside of DWA?

- A. Java Servlet Manager
- B. HTTP Servlet Manager
- C. Domino Servlet Manager
- D. Sametime Servlet Manager

**Correct Answers: C**

7: Which of the following is required on the WebSphere server for Lotus Notes users who use composite applications that contain portlet elements?

- A. A Lotus Notes 8 client
- B. Server client installer
- C. The user's Lotus Notes id file
- D. A Domino 8 server installation

**Correct Answers: B**

8: Each time David restarts the agent manager, certain agents that should run only once are running unscheduled. Which of the following steps may he perform to alleviate the issue while still allowing the agents to run as required?

- A. Set the agents to run on server restart only
- B. Remove the server name from the agent security tab
- C. Set the agent manager not to start by removing it from the notes.ini server tasks line
- D. Make copies of the necessary agents into a new database and move that database out of the data directory until necessary

**Correct Answers: A**

9: Troy, the Domino administrator, needs to update the Lotus Notes Standard 8.x users with a Lotus Notes maintenance release and a new shelf application. Which of the following is needed to perform this update?

- A. Smart Update
- B. Siteupdate.nsf
- C. Site Upgrade and Lotus Links
- D. Smart Upgrade and Siteupdate.nsf

**Correct Answers: D**

10: Directory assistance in Lotus Domino 8 enables you to specify when a secondary directory must be used only for authentication. This provides which of the following features?

- A. This blocks email from being forwarded to adjacent domains
- B. This avoids NAMELookups to reduce the number of ambiguous Name dialog boxes
- C. This help you validate your choice of host name for receiving authentication requests
- D. This scans group member lists to ensure that each member exists in an available directory that is configured in directory assistance

**Correct Answers: B**
