QUESTION 136

Which technology should a company use to connect a branch office to headquarters via an Internet connection while maintaining confidentiality and the flexibility to run a routing protocol between the two locations?

- A. GRE over IPsec
- B. IPsec
- C. GRE
- D. SSL VPN

Correct Answer: A

QUESTION 137

What information should be utilized to identify network applications that are running on an existing network infrastructure?

- A. customer information
- B. existing documentation
- C. traffic analysis
- D. external feedback
- E. user feedback

Correct Answer: C

QUESTION 138

According to fundamental design principles, which location is best for implementing Cisco QoS policies?

- A. hardware

- B. software
- C. Cisco 3900 Series Integrated Services Routers running IOS software
- D. WAN routers running IOS software

Correct Answer: A

QUESTION 139

Which technology allow multiple instances of a routing table to coexist on the same router at the same time?

- A. vPC
- B. Cisco virtual router
- C. VRF
- D. VSS

Correct Answer: C

QUESTION 140

What are two important aspects to consider when looking at backup circuit options for a branch location? (Choose two)

- A. local exchange carrier diversity
- B. type of dynamic routing protocol
- C. type of core switch
- D. backup MPLS connection
- E. Internet service provider diversity

Correct Answer: BE

QUESTION 141

Which virtualization solution provides redundancy using a pair of switches that appear as one logical switch and removes the need for a First HOP Redundancy Protocol?

- A. VDC
- B. VRRP
- C. vPC
- D. VSS

Correct Answer: D

Explanation:

https://www.cisco.com/c/en/us/products/collateral/switches/catalyst-6500-virtual-switching-system-1440/prod_qas0900aecd806ed74b.html

QUESTION 142

A network engineer must collect application-level information of deep attack?

- A. NBAR
- B. CiscoWorks
- C. SNMP collector
- D. NetFlow collector

E. Syslog

Correct Answer: A

QUESTION 143

Refer to the exhibit. In this suboptimal design of a homogeneous Cisco network, which version of spanning tree provides the fastest convergence?

- A. PVST+
- B. CST
- C. RPVST
- D. VSTP
- E. PVST

Correct Answer: C

QUESTION 144

Which option is one of the methods that Cisco routers and switches can use to share information between directly connected devices on a regular basis?

- A. NetFlow
- B. ARP
- C. NHRP
- D. CDP

Correct Answer: A

A network engineer is tasked to upgrade and expand a large existing production network. From the IOS CLI, what two protocols can be used to build a topology map of the existing network? (Choose two.)

- A. SNMP
- B. IP SLA
- C. ICMP Echo
- D. LLDP
- E. Traceroute

Correct Answer: DE

QUESTION 146

What three primary sources of information are needed to perform a network audit? (Choose three.)

- A. existing documentation
- B. new documentation
- C. existing network management software
- D. new network management tools
- E. management personnel
- F. technical personnel

Correct Answer: ACD

QUESTION 147

A network engineer must connect two sites. Each site has a different autonomous system number. Which method do you use to exchange?

- A. BGP
- B. IGP
- C. EIGRP
- D. OSPFv3

Correct Answer: A

QUESTION 148

Consider the reservation of IP Addressing what mask you will use in a point to point connection between two Buildings?

- A. 255.255.252.0
- B. 255.255.255.252
- C. 255.255.255.254

Correct Answer: B

QUESTION 149

DRAG DROP

Drag the security term on the left to the matching description on the right.

ACL	an access control method that is used to forward traffic that is generated from public networks to a specified segment of the corporate network
NAT	includes IOS features that perform network protocol conformance validations
DMZ	performs packet filtering to restrict access on which traffic types are forwarded through the corporate network
firewall	a security option that is used to hide an internal network address before packets are forwarded to another network

Correct Answer:

ACL	DMZ
NAT	firewall
DMZ	ACL
firewall	NAT

QUESTION 150

Which tool captures network traffic, decodes the protocols in the captured packets, and provides statistics to characterize errors, and response time?

- A. continuity tester
- B. protocol analyzer
- C. spectrum analyzer
- D. bit error rate tester

Correct Answer: B

Explanation:

Protocol analyzer is a tool that captures network traffic, decodes the protocols in the captured packets, and provides statistics to characterize load, errors, and response time
