**QUESTION 46**
You network contains an on-premises Active Directory domain. The domain contains a universal security group named WVDusers.

You have a hybrid Azure Active Directory (Azure AD) tenant. WVDusers syncs to Azure AD.

You have a Windows Virtual Desktop host pool that contains four Windows 10 Enterprise multi-session hosts.

You need to ensure that only the members of WVDusers can establish Windows Virtual Desktop sessions to the host pool.

What should you do?

A.   Assign WVDusers to an Azure role scoped to each host pool.
B.   On each session host, add WVDusers to the local Remote Desktop Users group.
C.   Assign WVDusers to an Azure role scoped to the session hosts.
D.   Assign WVDusers to an application group.

**Correct Answer:** D
**Explanation:**
https://docs.microsoft.com/en-us/azure/virtual-desktop/manage-app-groups

**QUESTION 47**
You have an Azure Virtual Desktop deployment.

You need to create a host pool. The solution must ensure that during periods of tow CPU usage, credits can be accumulated, and then used to raise performance above the purchased baseline during periods of high CPU usage.

Which virtual machine series should you specify when you create the pool?

A.   A-series
B.   D-series
C.   H-series
D.   B-series

**Correct Answer:** B
**Explanation:**
https://docs.microsoft.com/en-us/azure/virtual-machines/sizes-b-series-burstable

**QUESTION 48**
You have a Windows Virtual Desktop deployment.

You need to provide external users with access to the deployment. The external users have computers that run Windows 10 Pro and Windows 10 Enterprise. The users do not have the ability to install applications.

What should you recommend that the users use to connect to the deployment?

A.   Microsoft Edge
B.   RemoteApp and Desktop Connection

C.  Remote Desktop Manager
D.  Remote Desktop Connection

**Correct Answer:** A
**Explanation:**
https://docs.microsoft.com/en-us/azure/active-directory/governance/entitlement-management-
external-users
https://docs.microsoft.com/en-us/azure/virtual-desktop/connect-web

**QUESTION 49**
HOTSPOT
You are automating the deployment of an Azure Virtual Desktop host pool.

You deploy the Azure Resource Manager (ARM) template shown in the following exhibit.

```
1 ∨ {
2       "$schema": "https://schema.management.azure.com/schemas/2015-01-01/
   deploymentTemplate.json#",
3       "contentVersion": "1.0.0.0",
4 ∨    "parameters": {
5 ∨        "hostpools_HostPool2_name: {
6             "defaultValue": "HostPool2",
7             "type": "String"
8          }
9        },
10      },
11      "variables": {},
12 ∨    "resources": [
13 ∨      {
14           "type": "Microsoft.DesktopVirtualization/hostpools",
15           "apiVersion": "2020-11-02-preview",
16           "name": "[parameters('hostpools_HostPool2_name')]",
17 ∨        "location": "eastus",
18           "properties": {
19               "hostPoolType": "Personal",
20               "personalDesktopAssignmentType": "Automatic",
21               "maxSessionLimit": 999999,
22               "loadBalancerType": "Persistent",
23 ∨            "validationEnvironment": false,
24               "registrationInfo": {
25                   "registrationTokenOperation": "None"
26               },
27               "preferredAppGroupType": "Desktop",
28               "startVMOnConnect": false
29           }
30        }
31      ]
```

Use the drop-down menus to select the answer choice that completes each statement based on
the information presented in the Dockerfile.

NOTE: Each correct selection is worth one point.

Each session host in HostPool2 can contain

| |
|---|
| 1 session |
| 15 sessions |
| 99,999 sessions |

Each time a user connects, the user will connect to

| |
|---|
| a RemoteApp named Desktop |
| a permanently assigned virtual machine |
| a random virtual machine in the host pool |

**Correct Answer:**

Each session host in HostPool2 can contain

| |
|---|
| 1 session |
| 15 sessions |
| 99,999 sessions |

Each time a user connects, the user will connect to

| |
|---|
| a RemoteApp named Desktop |
| a permanently assigned virtual machine |
| a random virtual machine in the host pool |

**QUESTION 50**
HOTSPOT
You have an Azure Virtual Desktop host pool named Pool1 and an Azure Storage account named storage1.

Pool1 and storage1 are in the same Azure region.

The current network utilization of the session hosts during peak hours is 95%.

You plan to use FSLogix profile containers stored in storage1 for users that connect to Pool1.

You need to configure the session hosts and storage1 to minimize network latency when loading and updating profiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

For storage1:

| |
|---|
| Configure network routing. |
| Configure a private endpoint. |
| Configure the storage account type. |

For the session hosts:

| |
|---|
| Enable Write Accelerator. |
| Increase the Virtual machine size. |
| Add additional network adapters. |

**Correct Answer:**

For storage1:

| Configure network routing. |
| Configure a private endpoint. |
| Configure the storage account type. |

For the session hosts:

| Enable Write Accelerator. |
| Increase the Virtual machine size. |
| Add additional network adapters |

**QUESTION 51**
HOTSPOT
You have a Windows Virtual Desktop deployment.

You need to ensure that all the connections to the managed resources in the host pool require multi-factor authentication (MFA).

Which two settings should you modify in a conditional access policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
