Actions

- Run the New-AzureRmResourceGroupDeployment Azure PowerShell cmdlet.
- Create an Azure Resource Manager template file that has an extension of .json.
- Run the Import-AzureRmAutomationDscConfiguration Azure PowerShell cmdlet.
- Run the Start-AzureRmAutomationDscCompilationJob Azure PowerShell cmdlet.
- Create a Desired State Configuration (DSC) configuration file that has an extension of .ps1.

Answer Area

- 1 Create a Desired State Configuration (DSC) configuration file that has an extension of .ps1.
- 2 Run the Import-AzureRmAutomationDscConfiguration Azure PowerShell cmdlet.
- 3 Run the Start-AzureRmAutomationDscCompilationJob Azure PowerShell cmdlet.

QUESTION 2

DRAG DROP

You need to implement the code flow strategy for Project2 in Azure DevOps.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange in the correct order.

Actions

- Create a fork
- Create a branch
- Add a build validation policy.
- Add a build policy
- Create a repository
- Add an application access policy.

Answer Area

- 1 Create a repository
- 2 Add a build policy
- 3 Add a build validation policy.

Correct Answer:

Actions	Answer Area
Create a fork	Create a repository
Create a branch	Create a branch
Add a build validation policy.	Add a build validation policy.
Add a build policy	
Create a repository	
Add an application access policy.	

QUESTION 3

HOTSPOT

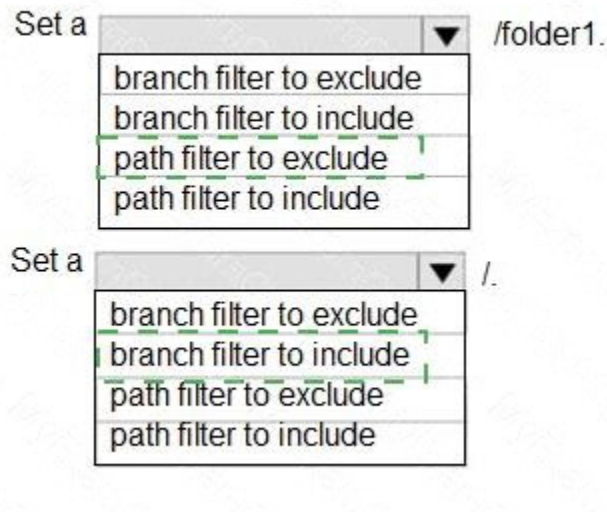

How should you configure the filters for the Project5 trigger? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Set a /folder1.

Set a /.

Correct Answer:

QUESTION 4

In Azure DevOps, you create Project3.

You need to meet the requirements of the project.

What should you do first?

- A. From Azure DevOps, create a service endpoint.
- B. From SonarQube, obtain an authentication token.
- C. From Azure DevOps, modify the build definition.
- D. From SonarQube, create a project.

Correct Answer: A

Explanation:

The first thing to do is to declare your SonarQube server as a service endpoint in your VSTS/DevOps project settings.

QUESTION 5

You add the virtual machines as managed nodes in Azure Automation State Configuration.

You need to configure the computer in Group7.

What should you do?

- A. Run the Register-AzureRmAutomationDscNode Azure Powershell cmdlet.
- B. Modify the ConfigurationMode property of the Local Configuration Manager (LCM).
- C. Install PowerShell Core.
- D. Modify the RefreshMode property of the Local Configuration Manager (LCM).

[Download Full Version AZ-400 Exam Dumps\(Updated in Feb/2023\)](#)

Correct Answer: A

Explanation:

The Register-AzureRmAutomationDscNode cmdlet registers an Azure virtual machine as an APS Desired State Configuration (DSC) node in an Azure Automation account.

Scenario:

The Azure DevOps organization includes:

The Docker extension

A deployment pool named Pool7 that contains 10 Azure virtual machines that run Windows Server 2016

Project 7	Project7 will contain a target deployment group named Group7 that maps to Pool7. Project7 will use Azure Automation State Configuration to maintain the desired state of the computers in Group7.

QUESTION 6

DRAG DROP

You need to implement Project6.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Open the release pipeline editor.
- Open the **Triggers** tab.
- Disable the continuous integration trigger.
- Enable Gates.
- Add a manual intervention task.
- Add Query Work Items.

Answer Area

- 1
- 2
- 3

Actions

- Open the release pipeline editor.
- Open the **Triggers** tab.
- Disable the continuous integration trigger.
- Enable Gates.
- Add a manual intervention task.
- Add Query Work Items.

Answer Area

- 1 Add a manual intervention task.
- 2 Add Query Work Items.
- 3 Enable Gates.

QUESTION 7

DRAG DROP

You need to configure Azure Automation for the computer in Group7.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Run the `Import-AzureRmAutomationDscConfiguration` Azure PowerShell cmdlet.
- Create a Desired State Configuration (DSC) configuration file that has an extension of .ps1.
- Run the `New-AzureRmResourceGroupDeployment` Azure PowerShell cmdlet.
- Run the `Start-AzureRmAutomationDscCompilationJob` Azure PowerShell cmdlet.
- Create an Azure Resource Manager template file that has an extension of .json.

Answer Area

Correct Answer:

Actions

- Run the `Import-AzureRmAutomationDscConfiguration` Azure PowerShell cmdlet.
- Create a Desired State Configuration (DSC) configuration file that has an extension of .ps1.
- Run the `New-AzureRmResourceGroupDeployment` Azure PowerShell cmdlet.
- Run the `Start-AzureRmAutomationDscCompilationJob` Azure PowerShell cmdlet.
- Create an Azure Resource Manager template file that has an extension of .json.

Answer Area

- 1 Create a Desired State Configuration (DSC) configuration file that has an extension of .ps1.
- 2 Run the `Import-AzureRmAutomationDscConfiguration` Azure PowerShell cmdlet.
- 3 Run the `Start-AzureRmAutomationDscCompilationJob` Azure PowerShell cmdlet.
