Note:
In Azure, the term resource refers to an entity managed by Azure. For example, virtual machines, virtual networks, and storage accounts are all referred to as Azure resources.

1. In the Settings blade for virtual network VNET, select Locks.
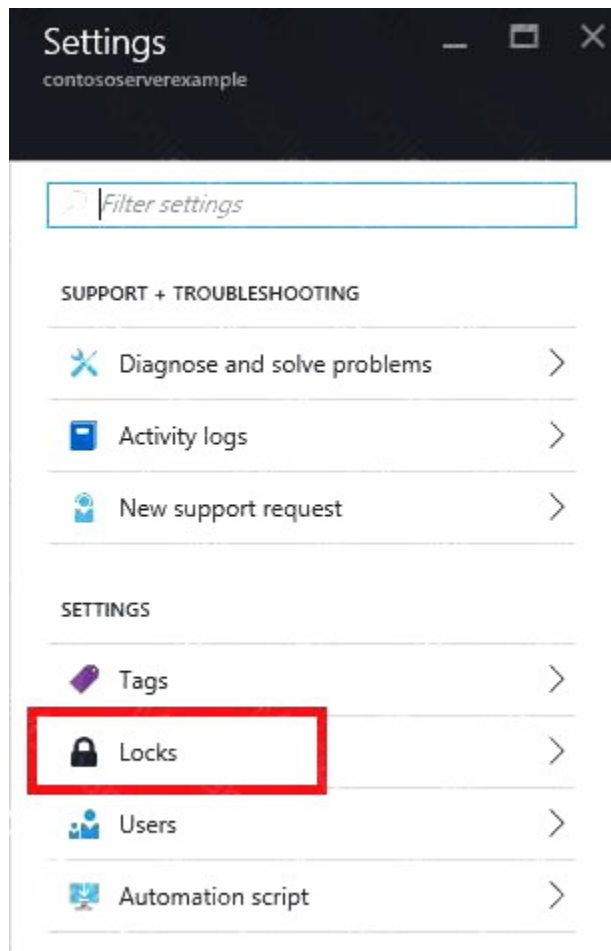

2. To add a lock, select Add.

3. For Lock type select Delete lock, and click OK

QUESTION 45
DRAG DROP
You have an Azure subscription that contains the following resources:

▪ A virtual network named VNET1 that contains two subnets named Subnet1 and Subnet2.
▪ A virtual machine named VM1 that has only a private IP address and connects to Subnet1.

You need to ensure that Remote Desktop connections can be established to VM1 from the internet.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange then in the correct order.

Correct Answer:

QUESTION 46
DRAG DROP
Your company has an Azure Active Directory (Azure AD) tenant named contoso.com.

The company is developing an application named App1. App1 will run as a service on server that runs Windows Server 2016. App1 will authenticate to contoso.com and access Microsoft Graph to

read directory data.

You need to delegate the minimum required permissions to App1.

Which three actions should you perform in sequence from the Azure portal? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Grant permissions
- Add a delegated permission.
- Configure Azure AD Application Proxy.
- Add an application permission.
- Create an app registration.

Answer Area

Correct Answer:

Actions

- Grant permissions
- Add a delegated permission.
- Configure Azure AD Application Proxy.
- Add an application permission.
- Create an app registration.

Answer Area

- Create an app registration.
- Add an application permission.
- Grant permissions

QUESTION 47
HOTSPOT
You have two Azure virtual machines in the East US2 region as shown in the following table.

Name	Operating system	Type	Tier
VM1	Windows Server 2008 R2	A3	Basic
VM2	Ubuntu 16.04-DAILY-LTS	L4s	Standard

You deploy and configure an Azure Key vault.

You need to ensure that you can enable Azure Disk Encryption on VM1 and VM2.

What should you modify on each virtual machine? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

VM1: ▼

The operating system version
The tier
The type

VM2: ▼

The operating system version
The tier
The type

Correct Answer:

VM1: ▼

The operating system version
The tier
The type

VM2: ▼

The operating system version
The tier
The type

QUESTION 48
DRAG DROP
You create an Azure subscription.

You need to ensure that you can use Azure Active Directory (Azure AD) Privileged Identity Management (PIM) to secure Azure AD roles.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Verify your identity by using multi-factor authentication (MFA).

Consent to PIM.

Sign up PIM for Azure AD roles.

Discover privileged roles.

Discover resources.

Answer Area

Correct Answer:
