Which of the following would be a reason to undertake a BCDR test?

- A. Functional change of the application
- B. Change in staff
- C. User interface overhaul of the application
- D. Change in regulations

Correct Answer: A

Explanation:

Any time a major functional change of an application occurs, a new BCDR test should be done to ensure the overall strategy and process are still applicable and appropriate.

QUESTION 136

What is the biggest challenge to data discovery in a cloud environment?

- A. Format
- B. Ownership
- C. Location
- D. Multitenancy

Correct Answer: C

Explanation:

With the distributed nature of cloud environments, the foremost challenge for data discovery is awareness of the location of data and keeping track of it during the constant motion of cloud storage systems.

QUESTION 137

Which crucial aspect of cloud computing can be most threatened by insecure APIs?

- A. Automation
- B. Redundancy
- C. Resource pooling
- D. Elasticity

Correct Answer: A

Explanation:

Cloud environments depend heavily on API calls for management and automation. Any vulnerability with the APIs can cause significant risk and exposure to all tenants of the cloud environment.

QUESTION 138

Which of the following should NOT be part of the requirement analysis phase of the software development lifecycle?

- A. Functionality
- B. Programming languages
- C. Software platform
- D. Security requirements

Correct Answer: D

Explanation:

Security requirements should be incorporated into the software development lifecycle (SDLC)

from the earliest requirement gathering stage and should be incorporated prior to the requirement analysis phase.

QUESTION 139

Which of the cloud cross-cutting aspects relates to the assigning of jobs, tasks, and roles, as well as to ensuring they are successful and properly performed?

- A. Service-level agreements
- B. Governance
- C. Regulatory requirements
- D. Auditability

Correct Answer: B

Explanation:

Governance at its core is the idea of assigning jobs, takes, roles, and responsibilities and ensuring they are satisfactory performed.

QUESTION 140

Which regulatory system pertains to the protection of healthcare data?

- A. HIPAA
- B. HAS
- C. HITECH
- D. HFCA

Correct Answer: A

Explanation:

The Health Insurance Portability and Accountability Act (HIPAA) sets stringent requirements in the United States for the protection of healthcare records.

QUESTION 141

Which aspect of cloud computing makes it very difficult to perform repeat audits over time to track changes and compliance?

- A. Virtualization
- B. Multitenancy
- C. Resource pooling
- D. Dynamic optimization

Correct Answer: A

Explanation:

Cloud environments will regularly change virtual machines as patching and versions are changed. Unlike a physical environment, there is little continuity from one period of time to another. It is very unlikely that the same virtual machines would be in use during a repeat audit.

QUESTION 142

Which security concept would business continuity and disaster recovery fall under?

- A. Confidentiality
- B. Availability
- C. Fault tolerance
- D. Integrity

[CCSP Exam Dumps](#) [CCSP PDF Dumps](#) [CCSP VCE Dumps](#) [CCSP Q&As](#)

[Download Full Version CCSP Exam Dumps\(Updated in Feb/2023\)](#)

Correct Answer: B

Explanation:

Disaster recovery and business continuity are vital concerns with availability. If data is destroyed or compromised, having regular backup systems in place as well as being able to perform disaster recovery in the event of a major or widespread problem allows operations to continue with an acceptable loss of time and data to management. This also ensures that sensitive data is protected and persisted in the event of the loss or corruption of data systems or physical storage systems.

QUESTION 143

Which of the following is NOT an application or utility to apply and enforce baselines on a system?

- A. Chef
- B. GitHub
- C. Puppet
- D. Active Directory

Correct Answer: B

Explanation:

GitHub is an application for code collaboration, including versioning and branching of code trees. It is not used for applying or maintaining system configurations.

QUESTION 144

Which of the cloud cross-cutting aspects relates to the ability for a cloud customer to easily remove their applications and data from a cloud environment?

- A. Reversibility
- B. Availability
- C. Portability
- D. Interoperability

Correct Answer: A

Explanation:

Reversibility is the ability for a cloud customer to easily remove their applications or data from a cloud environment, as well as to ensure that all traces of their applications or data have been securely removed per a predefined agreement with the cloud provider.

QUESTION 145

Which of the following is NOT a function performed by the record protocol of TLS?

- A. Encryption
- B. Acceleration
- C. Authentication
- D. Compression

Correct Answer: B

Explanation:

The record protocol of TLS performs the authentication and encryption of data packets, and in some cases compression as well. It does not perform any acceleration functions.

QUESTION 146

What concept does the "R" represent with the DREAD model?

- A. Reproducibility
- B. Repudiation
- C. Risk
- D. Residual

Correct Answer: A

Explanation:

Reproducibility is the measure of how easy it is to reproduce and successfully use an exploit. Scoring within the DREAD model ranges from 0, signifying a nearly impossible exploit, up to 10, which signifies something that anyone from a simple function call could exploit, such as a URL.

QUESTION 147

The SOC Type 2 reports are divided into five principles. Which of the five principles must also be included when auditing any of the other four principles?

- A. Confidentiality
- B. Privacy
- C. Security
- D. Availability

Correct Answer: C

Explanation:

Under the SOC guidelines, when any of the four principles other than security are being audited, which includes availability, confidentiality, processing integrity, and privacy, the security principle must also be included with the audit.

QUESTION 148

How many additional DNS queries are needed when DNSSEC integrity checks are added?

- A. Three
- B. Zero
- C. One
- D. Two

Correct Answer: B

Explanation:

DNSSEC does not require any additional DNS queries to be performed. The DNSSEC integrity checks and validations are all performed as part of the single DNS lookup resolution.

QUESTION 149

Which of the following is the sole responsibility of the cloud customer, regardless of which cloud model is used?

- A. Platform
- B. Infrastructure
- C. Governance
- D. Application

Correct Answer: C

Explanation:

[CCSP Exam Dumps](#) [CCSP PDF Dumps](#) [CCSP VCE Dumps](#) [CCSP Q&As](#)

Regardless of which cloud-hosting model is used, the cloud customer always has sole responsibility for the governance of systems and data.

QUESTION 150

Which of the following service categories entails the least amount of support needed on the part of the cloud customer?

- A. SaaS
- B. IaaS
- C. DaaS
- D. PaaS

Correct Answer: A

Explanation:

With SaaS providing a fully functioning application that is managed and maintained by the cloud provider, cloud customers incur the least amount of support responsibilities themselves of any service category.

QUESTION 151

Which of the following would NOT be a reason to activate a BCDR strategy?

- A. Staffing loss
- B. Terrorism attack
- C. Utility disruptions
- D. Natural disaster

Correct Answer: A

Explanation:

The loss of staffing would not be a reason to declare a BCDR situation because it does not impact production operations or equipment, and the same staff would be needed for a BCDR situation.

QUESTION 152

Which of the cloud cross-cutting aspects relates to the oversight of processes and systems, as well as to ensuring their compliance with specific policies and regulations?

- A. Governance
- B. Regulatory requirements
- C. Service-level agreements
- D. Auditability

Correct Answer: D

Explanation:

Auditing involves reports and evidence that show user activity, compliance with controls and regulations, the systems and processes that run and what they do, as well as information and data access and modification records. A cloud environment adds additional complexity to traditional audits because the cloud customer will not have the same level of access to systems and data as they would in a traditional data center.

QUESTION 153

Which of the cloud cross-cutting aspects relates to the ability to reuse or move components of an application or service?
