

**QUESTION 20**

Which of the following statements describes an acceptable disclosure practice?

- A. An organization's privacy policy discloses how data will be used among groups within the organization itself.
- B. With regard to limitation of use, internal disclosure policies override contractual agreements with third parties.
- C. Intermediaries processing sensitive data on behalf of an organization require stricter disclosure oversight than vendors.
- D. When an organization discloses data to a vendor, the terms of the vendor's privacy notice prevail over the organization's privacy notice.

**Correct Answer: A**

**QUESTION 21**

How should the sharing of information within an organization be documented?

- A. With a binding contract.
- B. With a data flow diagram.
- C. With a disclosure statement.
- D. With a memorandum of agreement.

**Correct Answer: C**

**QUESTION 22**

What can be used to determine the type of data in storage without exposing its contents?

- A. Collection records.
- B. Data mapping.
- C. Server logs.
- D. Metadata.

**Correct Answer: D**

**QUESTION 23**

What must be done to destroy data stored on "write once read many" (WORM) media?

- A. The data must be made inaccessible by encryption.
- B. The erase function must be used to remove all data.
- C. The media must be physically destroyed.
- D. The media must be reformatted.

**Correct Answer: C**

**QUESTION 24**

Which of the following would best improve an organization's system of limiting data use?

- A. Implementing digital rights management technology.
- B. Confirming implied consent for any secondary use of data.

**[Download Full Version CIPT Exam Dumps\(Updated in March/2023\)](#)**

- C. Applying audit trails to resources to monitor company personnel.
- D. Instituting a system of user authentication for company personnel.

**Correct Answer: C**

**QUESTION 25**

Which of the following is considered a records management best practice?

- A. Archiving expired data records and files.
- B. Storing decryption keys with their associated backup systems.
- C. Implementing consistent handling practices across all record types.
- D. Using classification to determine access rules and retention policy.

**Correct Answer: D**

**QUESTION 26**

Which of the following provides a mechanism that allows an end-user to use a single sign-on (SSO) for multiple services?

- A. The Open ID Federation.
- B. PCI Data Security Standards Council
- C. International Organization for Standardization.
- D. Personal Information Protection and Electronic Documents Act.

**Correct Answer: A**

**QUESTION 27**

A user who owns a resource wants to give other individuals access to the resource. What control would apply?

- A. Mandatory access control.
- B. Role-based access controls.
- C. Discretionary access control.
- D. Context of authority controls.

**Correct Answer: B**

**QUESTION 28**

What is the potential advantage of homomorphic encryption?

- A. Encrypted information can be analyzed without decrypting it first.
- B. Ciphertext size decreases as the security level increases.
- C. It allows greater security and faster processing times.
- D. It makes data impenetrable to attacks.

**Correct Answer: C**

**QUESTION 29**

What has been found to undermine the public key infrastructure system?

**[Download Full Version CIPT Exam Dumps\(Updated in March/2023\)](#)**

- A. Man-in-the-middle attacks.
- B. Inability to track abandoned keys.
- C. Disreputable certificate authorities.
- D. Browsers missing a copy of the certificate authority's public key.

**Correct Answer: D**

**QUESTION 30**

A credit card with the last few numbers visible is an example of what?

- A. Masking data
- B. Synthetic data
- C. Sighting controls.
- D. Partial encryption

**Correct Answer: A**

**QUESTION 31**

What is an example of a just-in-time notice?

- A. A warning that a website may be unsafe.
- B. A full organizational privacy notice publicly available on a website
- C. A credit card company calling a user to verify a purchase before it is authorized
- D. Privacy information given to a user when he attempts to comment on an online article.

**Correct Answer: D**

**QUESTION 32**

A vendor has been collecting data under an old contract, not aligned with the practices of the organization. Which is the preferred response?

- A. Destroy the data
- B. Update the contract to bring the vendor into alignment.
- C. Continue the terms of the existing contract until it expires.
- D. Terminate the contract and begin a vendor selection process.

**Correct Answer: B**

**QUESTION 33**

What must be used in conjunction with disk encryption?

- A. Increased CPU speed.
- B. A strong password.
- C. A digital signature.
- D. Export controls.

**Correct Answer: C**

**QUESTION 34**

Which is NOT a way to validate a person's identity?

- A. Swiping a smartcard into an electronic reader.
- B. Using a program that creates random passwords.
- C. Answering a question about "something you know".
- D. Selecting a picture and tracing a unique pattern on it

**Correct Answer: B**

**QUESTION 35**

Revocation and reissuing of compromised credentials is impossible for which of the following authentication techniques?

- A. Biometric data.
- B. Picture passwords.
- C. Personal identification number.
- D. Radio frequency identification.

**Correct Answer: D**

**QUESTION 36**

What is the main function of the Amnesic Incognito Live System or TAILS device?

- A. It allows the user to run a self-contained computer from a USB device.
- B. It accesses systems with a credential that leaves no discernable tracks.
- C. It encrypts data stored on any computer on a network.
- D. It causes a system to suspend its security protocols.

**Correct Answer: A**

**QUESTION 37**

Which is NOT a drawback to using a biometric recognition system?

- A. It can require more maintenance and support.
- B. It can be more expensive than other systems
- C. It has limited compatibility across systems.
- D. It is difficult for people to use.

**Correct Answer: A**

**QUESTION 38**

What is a main benefit of data aggregation?

- A. It is a good way to perform analysis without needing a statistician.
- B. It applies two or more layers of protection to a single data record.
- C. It allows one to draw valid conclusions from small data samples.
- D. It is a good way to achieve de-identification and unlinkability.

**[Download Full Version CIPT Exam Dumps\(Updated in March/2023\)](#)**

**Correct Answer:** C

**QUESTION 39**

Under the Family Educational Rights and Privacy Act (FERPA), releasing personally identifiable information from a student's educational record requires written permission from the parent or eligible student in order for information to be?

- A. Released to a prospective employer.
- B. Released to schools to which a student is transferring.
- C. Released to specific individuals for audit or evaluation purposes.
- D. Released in response to a judicial order or lawfully ordered subpoena.

**Correct Answer:** C

**QUESTION 40**

After committing to a Privacy by Design program, which activity should take place first?

- A. Create a privacy standard that applies to all projects and services.
- B. Establish a retention policy for all data being collected.
- C. Implement easy to use privacy settings for users.
- D. Perform privacy reviews on new projects.

**Correct Answer:** B

**QUESTION 41**

When releasing aggregates, what must be performed to magnitude data to ensure privacy?

- A. Value swapping.
- B. Noise addition.
- C. Basic rounding.
- D. Top coding.

**Correct Answer:** B

**QUESTION 42**

What term describes two re-identifiable data sets that both come from the same unidentified individual?

- A. Pseudonymous data.
- B. Anonymous data.
- C. Aggregated data.
- D. Imprecise data.

**Correct Answer:** B

**QUESTION 43**

Which of the following most embodies the principle of Data Protection by Default?

- A. A messaging app for high school students that uses HTTPS to communicate with the server.
