QUESTION 74

The purpose of information classification is to

- A. Assign access controls.
- B. Apply different protective measures.
- C. Define the parameters required for security labels.
- D. Ensure separation of duties.

Correct Answer: B

QUESTION 75

Who should determine the appropriate access control of information?

- A. Owner
- B. User
- C. Administrator
- D. Server

Correct Answer: A

QUESTION 76

What is the main responsibility of the information owner?

- A. making the determination to decide what level of classification the information requires
- B. running regular backups
- C. audit the users when they require access to the information
- D. periodically checking the validity and accuracy for all data in the information system

Correct Answer: A

QUESTION 77

What process determines who is trusted for a given purpose?

- A. Identification
- B. Authorization
- C. Authentication
- D. Accounting

Correct Answer: B

QUESTION 78

The intent of least privilege is to enforce the most restrictive user rights required

- A. To execute system processes.
- B. By their job description.
- C. To execute authorized tasks.
- D. By their security role.

Correct Answer: C

QUESTION 79

What principle requires that a user be given no more privilege then necessary to perform a job?

- A. Principle of aggregate privilege.
- B. Principle of most privilege.
- C. Principle of effective privilege.
- D. Principle of least privilege.

Correct Answer: D

QUESTION 80

To ensure least privilege requires that ______ is identified.

- A. what the users privilege owns
- B. what the users job is
- C. what the users cost is
- D. what the users group is

Correct Answer: B

QUESTION 81

The concept of least privilege currently exists within the context of:

- A. ISO
- B. TCSEC
- C. OSI
- D. IEFT

Correct Answer: B

QUESTION 82

Which of the following rules is less likely to support the concept of least privilege?

A. The number of administrative accounts should be kept to a minimum

B. Administrators should use regular accounts when performing routing operations like reading

mail

C. Permissions on tools that are likely to be used by hackers should be as restrictive as possible

D. Only data to and from critical systems and applications should be allowed through the

firewall

Correct Answer: D

QUESTION 83

Which level of "least privilege" enables operators the right to modify data directly in it's original location, in addition to data copied from the original location?

A. Access Change

B. Read/Write

C. Access Rewrite

D. Access modify

Correct Answer: A

QUESTION 84

This is a common security issue that is extremely hard to control in large environments. It occurs when a user has more computer rights, permissions, and privileges that what is required for the tasks the user needs to fulfill. What best describes this scenario?

A. Excessive Rights

B. Excessive Access

C. Excessive Permissions

D. Excessive Privileges

Correct Answer: D

QUESTION 85

One method to simplify the administration of access controls is to group

A. Capabilities and privileges

B. Objects and subjects

C. Programs and transactions

CISSP Exam Dumps CISSP PDF Dumps CISSP VCE Dumps CISSP Q&As https://www.ensurepass.com/CISSP.html

D. Administrators and managers

Correct Answer: B

QUESTION 86

Cryptography does not concern itself with:

- A. Availability
- B. Integrity
- C. Confidentiality
- D. Authenticity

Correct Answer: A

QUESTION 87

Which of the following measures would be the BEST deterrent to the theft of corporate information from a laptop which was left in a hotel room?

- A. Store all data on disks and lock them in an in-room safe.
- B. Remove the batteries and power supply from the laptop and store them separately from the computer.
- C. Install a cable lock on the laptop when it is unattended.
- D. Encrypt the data on the hard drive.

Correct Answer: D

QUESTION 88

To support legacy applications that rely on risky protocols (e.g., plain text passwords), which one of the following can be implemented to mitigate the risks on a corporate network?

- A. Implement strong centrally generated passwords to control use of the vulnerable applications.
- B. Implement a virtual private network (VPN) with controls on workstations joining the VPN.
- C. Ensure that only authorized trained users have access to workstations through physical access control.
- D. Ensure audit logging is enabled on all hosts and applications with associated frequent log reviews.

Correct Answer: B

QUESTION 89

Which of the following computer crime is more often associated with insiders?

- A. IP spoofing
- B. Password sniffing
- C. Data diddling
- D. Denial of Service (DOS)

Correct Answer: C

QUESTION 90

The technique of skimming small amounts of money from multiple transactions is called the

- A. Scavenger technique
- B. Salami technique
- C. Synchronous attack technique
- D. Leakage technique

Correct Answer: B

QUESTION 91

What best describes a scenario when an employee has been shaving off pennies from multiple accounts and depositing the funds into his own bank account?

- A. Data fiddling
- B. Data diddling
- C. Salami techniques
- D. Trojan horses

Correct Answer: C

QUESTION 92

What is the act of willfully changing data, using fraudulent input or removal of controls called?

- A. Data diddling
- B. Data contaminating
- C. Data capturing
- D. Data trashing

Correct Answer: A
