QUESTION 226

Covert channel is a communication channel that can be used for:

- A. Hardening the system.
- B. Violating the security policy.
- C. Protecting the DMZ.
- D. Strengthening the security policy.

Correct Answer: B

QUESTION 227

What is an indirect way to transmit information with no explicit reading of confidential information?

- A. Covert channels
- B. Backdoor
- C. Timing channels
- D. Overt channels

Correct Answer: A

QUESTION 228

Which one of the following describes a covert timing channel?

- A. Modulated to carry an unintended information signal that can only be detected by special, sensitive receivers.
- B. Used by a supervisor to monitor the productivity of a user without their knowledge.
- C. Provides the timing trigger to activate a malicious program disguised as a legitimate function.
- D. Allows one process to signal information to another by modulating its own use of system resources.

Correct Answer: D

QUESTION 229

Covert channel analysis is required for

- A. Systems processing Top Secret or classified information.
- B. A Trusted Computer Base with a level of trust B2 or above.
- C. A system that can be monitored in a supervisor state.
- D. Systems that use exposed communication links.

Correct Answer: B

QUESTION 230

In multi-processing systems, which one of the following lacks mandatory controls and is NORMALLY AVOIDED for communication?

- A. Storage channels
- B. Covert channels
- C. Timing channels
- D. Object channels

Correct Answer: B

QUESTION 231

What security risk does a covert channel create?

- A. A process can signal information to another process.
- B. It bypasses the reference monitor functions.
- C. A user can send data to another user.
- D. Data can be disclosed by inference.

Correct Answer: B

QUESTION 232

What is the essential difference between a self-audit and an independent audit?

- A. Tools used
- B. Results
- C. Objectivity
- D. Competence

Correct Answer: C

QUESTION 233

What is called the formal acceptance of the adequacy of a system's overall security by the management?

- A. Certification
- B. Acceptance
- C. Accreditation

D. Evaluation

Correct Answer: C

QUESTION 234

FIPS-140 is a standard for the security of:

- A. Cryptographic service providers
- B. Smartcards
- C. Hardware and software cryptographic modules
- D. Hardware security modules

Correct Answer: C

QUESTION 235

Which of the following will you consider as the MOST secure way of authentication?

- A. Biometric
- B. Password
- C. Token
- D. Ticket Granting

Correct Answer: A

QUESTION 236

In biometric identification systems, at the beginning, it was soon apparent that truly positive identification could only be based on physical attributes of a person. This raised the necessity of answering 2 questions:

- A. What was the sex of a person and his age?
- B. What part of the body to be used and how to accomplish identification to be viable?
- C. What was the age of a person and his income level?
- D. What was the tone of the voice of a person and his habits?

Correct Answer: B

QUESTION 237

What is called the percentage of invalid subjects that are falsely accepted?

- A. False Rejection Rate (FRR) or Type I Error

- B. False Acceptance Rate (FAR) or Type II Error
- C. Crossover Error Rate (CER)
- D. True Acceptance Rate (TAR) or Type III error

Correct Answer: B

QUESTION 238

Which of the following biometrics devices has the high Crossover Error Rate (CER)?

- A. Iris scan
- B. Hand Geometry
- C. Voice pattern
- D. Fingerprints

Correct Answer: C

QUESTION 239

Which of the following biometric parameters are better suited for authentication use over a long period of time?

- A. Iris pattern
- B. Voice pattern
- C. Signature dynamics
- D. Retina pattern

Correct Answer: A

QUESTION 240

Which one of the following is the MOST critical characteristic of a biometrics system?

- A. Acceptability
- B. Accuracy
- C. Throughput
- D. Reliability

Correct Answer: B

QUESTION 241

Which of the following biometric devices has the lowest user acceptance level?

- A. Voice recognition
- B. Fingerprint scan
- C. Hand geometry
- D. Signature recognition

Correct Answer: B

QUESTION 242

Biometric performance is most commonly measured in terms of:

- A. FRR and FAR
- B. FAC and ERR
- C. IER and FAR
- D. FRR and GIC

Correct Answer: A

QUESTION 243

What is the most critical characteristic of a biometric identifying system?

- A. Perceived intrusiveness
- B. Storage requirements
- C. Accuracy
- D. Reliability

Correct Answer: C

QUESTION 244

Which of the following biometric characteristics cannot be used to uniquely authenticate an individual's identity?

- A. Retina scans
- B. Iris scans
- C. Palm scans
- D. Skin scans

Correct Answer: D
