QUESTION 420

SQL commands do not include which of the following?

- A. Select, Update
- B. Grant, Revoke
- C. Delete, Insert
- D. Add, Replace

Correct Answer: D

QUESTION 421

A persistent collection of interrelated data items can be defined as which of the following?

- A. database
- B. database management system
- C. database security
- D. database shadowing

Correct Answer: A

QUESTION 422

Which one of the following is commonly used for retrofitting multilevel security to a Database Management System?

- A. Trusted kernel
- B. Kernel controller
- C. Front end controller
- D. Trusted front-end

Correct Answer: D

QUESTION 423

Which of the following is the marriage of object-oriented and relational technologies combining the attributes of both?

- A. object-relational database
- B. object-oriented database
- C. object-linking database
- D. object-management database

Correct Answer: A

QUESTION 424

A department manager has read access to the salaries of the employees in his/her department but not to the salaries of employees in other departments. A database security mechanism that enforces this policy would typically be said to provide which of the following?

- A. content-dependent access control
- B. context-dependent access control
- C. least privileges access control
- D. ownership-based access control

Correct Answer: A

QUESTION 425

Which of the following is an important part of database design that ensures that attributes in a table depend only on the primary key?

- A. Normalization
- B. Assimilation
- C. Reduction
- D. Compaction

Correct Answer: A

QUESTION 426

Which of the following does not address Database Management Systems (DBMS) Security?

- A. Perturbation
- B. Cell suppression
- C. Padded Cells
- D. Partitioning

Correct Answer: C

QUESTION 427

Which of the following is commonly used for retrofitting multilevel security to a database management system?

- A. trusted front-end
- B. trusted back-end
- C. controller
- D. kernel

Correct Answer: A

QUESTION 428

Normalizing data within a database includes all of the following except which?

- A. Eliminating repeating groups by putting them into separate tables.
- B. Eliminating redundant data.
- C. Eliminating attributes in a table that are not dependent on the primary key of that table.
- D. Eliminating duplicate key fields by putting them into separate tables.

Correct Answer: D

QUESTION 429

SQL commands do not include which of the following?

- A. Select, Update
- B. Grant, Revoke
- C. Delete, Insert
- D. Add, Replace

Correct Answer: D

QUESTION 430

SQL security issues include which of the following?

- A. The granularity of authorizations.
- B. The size of databases.
- C. The complexity of key structures.
- D. The number of candidate key elements.

Correct Answer: A

QUESTION 431

Which of the following are placeholders for literal values in a Structured Query Language (SQL) query being sent to the database on a server?

- A. Bind variables
- B. Assimilation variables
- C. Reduction variables
- D. Resolution variables

[Download Full Version CISSP Exam Dumps\(Updated in Feb/2023\)](#)

Correct Answer: A

QUESTION 432

What ensures that attributes in a table depend only on the primary key?

- A. Referential integrity
- B. The database management system (DBMS)
- C. Data Normalization
- D. Entity integrity

Correct Answer: C

QUESTION 433

Which of the following represent the rows of the table in a relational database?

- A. attributes
- B. records or tuples
- C. record retention
- D. relation

Correct Answer: B

QUESTION 434

With regard to databases, which of the following has characteristics of ease of reusing code and analysis and reduced maintenance?

- A. Object-Oriented Data Bases (OODB)
- B. Object-Relational Data Bases (ORDB)
- C. Relational Data Bases
- D. Data Base management systems (DBMS)

Correct Answer: A

QUESTION 435

Complex applications involving multimedia, computer aided design, video, graphics, and expert systems are more suited to which of the following?

- A. Object-Oriented Data Bases (OODB)
- B. Object-Relational Data Bases
- C. Relational Data Bases

[Download Full Version CISSP Exam Dumps\(Updated in Feb/2023\)](#)

D. Data base management systems (DBMS)

Correct Answer: A

QUESTION 436

Which of the following refers to the number of columns in a table?

- A. Schema
- B. Relation
- C. Degree
- D. Cardinality

Correct Answer: C

QUESTION 437

Which of the following refers to the number of rows in a relation?

- A. cardinality
- B. degree
- C. depth
- D. breadth

Correct Answer: A

QUESTION 438

Which of the following refers to the number of columns in a relation?

- A. degree
- B. cardinality
- C. depth
- D. breadth

Correct Answer: A

QUESTION 439

What is one disadvantage of content-dependent protection of information?

- A. It increases processing overhead.
- B. It requires additional password entry.
- C. It exposes the system to data locking.
