named contoso.com. Contoso.com contains the users shown in the following table.

Name	Type	Role
User1	Member	*None*
User2	Member	Security administrator, Guest inviter
User3	Member	User administrator
User4	Guest	*None*

Contoso.com is configured as shown in the following exhibit.

External collaboration settings

Save   Discard

Guest users permissions are limited

Yes | **No**

Admins and users in the guest inviter role can invite

Yes | **No**

Members can invite

Yes | No

Guests can invite

Yes | No

Collaboration restrictions

- ● Allow invitations to be sent to any domain (most inclusive)
- ○ Deny invitations to the specified domains
- ○ Allow invitations only to the specified domains (most restrictive)

You need to ensure that guest users can be created in the tenant.

Which setting should you modify?

A.   Guests can invite.
B.   Guest users permissions are limited.

C. Members can invite.
D. Admins and users in the guest inviter role can invite.
E. Deny invitations to the specified domains

Correct Answer: D

QUESTION 48
HOTSPOT
Your network contains an on premises Active Directory domain named contoso.com. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You plan to establish federation authentication between on premises Active Directory and the Azure AD tenant by using Active Directory Federation Services (AD FS).

You need to establish the federation.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Action to perform before establishing the federation:
| From the Azure portal, add a custom domain name. |
| From the Azure portal, configure an authentication method. |
| From a domain controller, install a Pass-through Authentication Agent. |
| From a domain controller, install Windows Identity Foundation 3.5. |

Tool to use to establish the federation:
| Active Directory Domains and Trusts |
| Azure AD Connect |
| The AD FS console |
| The Azure portal |

Correct Answer:

Action to perform before establishing the federation:
| From the Azure portal, add a custom domain name. |
| From the Azure portal, configure an authentication method. |
| From a domain controller, install a Pass-through Authentication Agent. |
| From a domain controller, install Windows Identity Foundation 3.5. |

Tool to use to establish the federation:
| Active Directory Domains and Trusts |
| Azure AD Connect |
| The AD FS console |
| The Azure portal |

QUESTION 49
Your network contains a single Active Directory domain and two Microsoft Azure Active Directory

(Azure AD) tenants.

You plan to implement directory synchronization for both Azure AD tenants. Each tenant will contain some of the Active Directory users.

You need to recommend a solution for the planned directory synchronization.

What should you include in the recommendation?

A. Deploy two servers that run Azure AD Connect, and then filter the users for each tenant by using organizational unit (OU)-based filtering.
B. Deploy one server that runs Azure AD Connect, and then specify two sync groups.
C. Deploy one server that runs Azure AD Connect, and then filter the users for each tenant by using organizational unit (OU)-based filtering.
D. Deploy one server that runs Azure AD Connect, and then filter the users for each tenant by using domainbased filtering.

Correct Answer: A
Explanation:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/plan-connect-topologies#multiple-azure-adtenants

QUESTION 50
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection.

Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailbox hosted in the main office.

The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox.

You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365.

You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails.

Solution: You deploy a site-to-site VPN from each branch office to Microsoft Azure.

Does this meet the goal?

A. Yes
B. NO

Correct Answer: B

QUESTION 51
You purchase Microsoft 365, and then implement directory synchronization.

You plan to publish the web applications.

You need to ensure that all the applications are accessible by using the My Apps portal. The solution must minimize administrative effort.

What should you do first?

A. Deploy one conditional access policy.
B. Deploy one connector.
C. Create four application registrations.
D. Create a site-to-site VPN from Microsoft Azure to the on-premises network.

Correct Answer: B

QUESTION 52
DRAG DROP
Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You purchase a domain named contoso.com from a registrar and add all the required DNS records.

You create a user account named User1. User1 is configured to sign in as user1@contoso.onmicrosoft.com.

You need to configure User1 to sign in as user1@contoso.com.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

| Run `Set-MsolDomainAuthentication - TenantID contoso.com` |
| Modify the email address of User1. |
| Modify the username of User1. |
| Verify the custom domain. |
| Add a contoso.com as a SAN for an X.509 certificate. |
| Add a custom domain name. |

Answer Area

Correct Answer:

Actions

Run Set-MsolDomainAuthentication
– TenantID contoso.com

Modify the email address of User1.

Modify the username of User1.

Verify the custom domain.

Add a contoso.com as a SAN for an X.509
certificate.

Add a custom domain name.

Answer Area

Add a custom domain name.

Verify the custom domain.

Modify the username of User1.

QUESTION 53
HOTSPOT
You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes
a user named User1.

You enable multi-factor authentication for contoso.com and configure the following two fraud alert
settings:

▪ Set Allow users to submit fraud alerts: On
▪ Automatically block users who report fraud: On

You need to instruct the users in your organization to use the fraud reporting features correctly.

What should you tell the users to do? To answer, select the appropriate options in the answer
area.

NOTE: Each correct selection is worth one point.

A user can report fraud on her account by:

Typing a special code after receiving an alert call
Sending an email message to an administrator
Using the Microsoft Authenticator app

If User1 reports fraud on his account, the
account will be blocked automatically for:

6 hours
1 day
7 days
90 days

Correct Answer:
