The screenshot shows the 'Password protection (Preview)' settings in Windows Server Active Directory. The 'Custom smart lockout' section has 'Lockout threshold' set to 5 and 'Lockout duration in seconds' set to 60. The 'Custom banned passwords' section has 'Enforce custom list' set to 'Yes' and a 'Custom banned password list' containing 'Pa\$\$w0rd', 'Conto\$01', and 'AzureAD!!'. The 'Password protection for Windows Server Active Directory' section has 'Enable password protection on Windows Server Active Directory' set to 'Yes' and 'Mode' set to 'Enforced'.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

If users are locked out of their account, they have [answer choice].

▼
five sign-in attempts each subsequent minute
one sign-in attempt each subsequent minute
five sign-in attempts every five minutes
one sign-in attempt every five minutes

Users can create a password of [answer choice].

▼
Password11
Conto\$01Pa\$\$word
AzureAD!!111
pa\$\$w0rd

**Correct Answer:**

If users are locked out of their account, they have [answer choice].

▼
five sign-in attempts each subsequent minute
one sign-in attempt each subsequent minute
five sign-in attempts every five minutes
one sign-in attempt every five minutes

Users can create a password of [answer choice].

### QUESTION 60

#### HOTSPOT

Your network contains an Active Directory domain and a Microsoft Azure Active Directory (Azure AD) tenant.

You implement directory synchronization for all 10,000 users in the organization.

You automate the creation of 100 new user accounts.

You need to ensure that the new user accounts synchronize to Azure AD as quickly as possible.

Which command should you run? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer Area

<div>▼</div> <div>Start-ADSyncSyncCycle</div> <div>Set-ADSyncScheduler</div> <div>Invoke-ADSyncRunProfile</div>	-PolicyType	<div>▼</div> <div>Delta</div> <div>Initial</div> <div>Full</div>
---	-------------	--

Correct Answer:

#### Answer Area

<div>▼</div> <div>Start-ADSyncSyncCycle</div> <div>Set-ADSyncScheduler</div> <div>Invoke-ADSyncRunProfile</div>	-PolicyType	<div>▼</div> <div>Delta</div> <div>Initial</div> <div>Full</div>

### QUESTION 61

#### HOTSPOT

Your company has offices in several cities and 100,000 users.

The network contains an Active Directory domain contoso.com.

You purchase Microsoft 365 and plan to deploy several Microsoft 365 services.

You are evaluating the implementation of pass-through authentication and seamless SSO. Azure AD Connect will NOT be in staging mode.

You need to identify the redundancy limits for the planned implementation.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### QUESTION 62

Your company has a Microsoft 365 E3 subscription.

All devices run Windows 10 Pro and are joined to Microsoft Azure Active Directory (Azure AD).

You need to change the edition of Windows 10 to Enterprise the next time users sign in to their computer. The solution must minimize downtime for the users.

What should you use?

- A. Subscription Activation
- B. Windows Update
- C. Windows Autopilot
- D. an in-place upgrade

**Correct Answer: C**

**Explanation:**

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

### QUESTION 63

Your network contains an Active Directory forest named contoso.local.

You purchase a Microsoft 365 subscription.

You plan to move to Microsoft and to implement a hybrid deployment solution for the next 12 months.

You need to prepare for the planned move to Microsoft 365.

What is the best action to perform before you implement directory synchronization? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Purchase a third-party X.509 certificate.
- B. Rename the Active Directory forest.
- C. Purchase a custom domain name.
- D. Create an external forest trust.

**Correct Answer: C**

### QUESTION 64

HOTSPOT

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes the users shown in the following table.

Name	Usage location	Membership
User1	<i>Not applicable</i>	Group1
User2	United States	Group2
User3	United States	<i>Not applicable</i>
