A safe attachments policy that uses Dynamic Delivery is applied to all recipients who match your SMTP domains.

You need to prevent attachments from being scanned when internal users send email to one another.

What should you do?

- A. From the Security & Compliance admin center, modify the safe attachments policy.
- B. From the Security & Compliance admin center, modify the Service assurance settings.
- C. From the Exchange admin center, create a transport rule.
- D. From the Exchange admin center, modify the malware filter.

Correct Answer: C

Explanation:

Create a transport rule (or mail flow rule as they are called nowadays) to configure the message header: X-MS-Exchange-Organization-SkipSafeAttachmentProcessing.

QUESTION 68

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that contains 1,000 mailboxes.

All the users in the sales department at your company are in a group named Sales.

The company is implementing a new policy to restrict the use of email attachments for the users in the Sales group.

You need to prevent all email messages that contain attachments from being delivered to the users in the Sales group.

Solution: You modify the Exchange Online Protection (EOP) settings.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Explanation:

You can block common attachments (attachments commonly used as malware) in EOP but not all attachments as required in this question. Instead, you should create a mail flow rule.
