Statements	Yes	No
In the Monreal office, if User1 downloads 40 files in 30 seconds, an alert will be created.	0	0
In the Seattle, if User2 downloads one file per second for two minutes, an alert will be created.		0
In the New York office, if User1 downloads 40 files in 10 seconds, an alert will be created.	0	0
Correct Answer:		
Statements	Yes	No
In the Monreal office, if User1 downloads 40 files in 30 seconds, an alert will be created.		\bigcirc
In the Seattle, if User2 downloads one file per second for two minutes, an alert will be created.	[0]	0
In the New York office, if User1 downloads 40 files in 10 seconds, an alert will be created.	0	0

QUESTION 8

You have a Microsoft 365 subscription.

From the Microsoft 365 admin center, you create a new user.

You plan to assign the Reports reader role to the user.

You need to see the permissions of the Reports reader role.

Which admin center should you use?

- A. Azure Active Directory
- B. Cloud App Security
- C. Security & Compliance
- D. Microsoft 365

Correct Answer: A

QUESTION 9

Your network contains an on-premises Active Directory domain. The domain contains servers that run Windows Server and have advanced auditing enabled.

The security logs of the servers are collected by using a third-party SIEM solution.

You purchase a Microsoft 365 subscription and plan to deploy Azure Advanced Threat Protection

(ATP) by using standalone sensors.

You need to ensure that you can detect when sensitive groups are modified and when malicious services are created.

What should you do?

- A. Configure auditing in the Office 365 Security & Compliance center.
- B. Turn off Delayed updates for the Azure ATP sensors.
- C. Modify the Domain synchronizer candidate's settings on the Azure ATP sensors.
- D. Integrate SIEM and Azure ATP.

Correct Answer: C **Explanation**:

https://docs.microsoft.com/en-us/azure-advanced-threat-protection/install-atp-step5

QUESTION 10

HOTSPOT

You have a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com. OneDrive stores files that are shared with external users. The files are configured as shown in the following table.

Name	Applied label
File1	Label1
File2	Label1, Label2
File3	Label2

You create a data loss prevention (DLP) policy that applies to the content stored in OneDrive accounts. The policy contains the following three rules:

- Rule1:
- Conditions: Label 1, Detect content that's shared with people outside my organization
- Actions: Restrict access to the content for external users
- User notifications: Notify the user who last modified the content
- User overrides: On
- Priority: 0
- Rule2:
- Conditions: Label 1 or Label2
- Actions: Restrict access to the content
- Priority: 1
- Rule3:
- Conditions: Label2, Detect content that's shared with people outside my organization
- Actions: Restrict access to the content for external users
- User notifications: Notify the user who last modified the content
- User overrides: On
- Priority: 2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area				
	Statements	Yes	No	
	External users can access File1.	0	0	
	The users in contoso.com can access File2.	0	0	
	External users can access File3.	0	0	
Correct Answer: Answer Area				
	Statements	Yes	No	
	External users can access File1.		0	
	The users in contoso.com can access File2.	0	[0]	
	External users can access File3.	0	[0]	

QUESTION 11

You have a Microsoft 365 subscription.

You enable auditing for the subscription.

You plan to provide a user named Auditor with the ability to review audit logs.

You add Auditor to the Global administrator role group.

Several days later, you discover that Auditor disabled auditing.

You remove Auditor from the Global administrator role group and enable auditing.

- Be prevented from disabling auditing
- Use the principle of least privilege
- Be able to review the audit log

To which role group should you add Auditor?

- A. Security operator
- B. Security reader
- C. Security administrator
- D. Compliance administrator

Correct Answer: A Explanation:

https://docs.microsoft.com/en-us/office365/securitycompliance/permissions-in-the-security-and-compliance-center

QUESTION 12

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an on-premises Active Directory domain named contoso.com.

You install and run Azure AD Connect on a server named Server1 that runs Windows Server.

You need to view Azure AD Connect events.

You use the Security event log on Server1.

Does that meet the goal?

A. Yes

B. No

Correct Answer: B Explanation:

https://support.pingidentity.com/s/article/PingOne-How-to-troubleshoot-an-AD-Connect-Instance

QUESTION 13

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an on-premises Active Directory domain named contoso.com.

You install and run Azure AD Connect on a server named Server1 that runs Windows Server.

You need to view Azure AD Connect events.

You use the System event log on Server1.

Does that meet the goal?

A. Yes

B. No

Correct Answer: B

Explanation:

https://support.pingidentity.com/s/article/PingOne-How-to-troubleshoot-an-AD-Connect-Instance

QUESTION 14

You have a Microsoft 365 subscription that includes a user named Admin1.

You need to ensure that Admin1 can preserve all the mailbox content of users, including their deleted items.

The solution must use the principle of least privilege.

What should you do?

- A. From the Microsoft 365 admin center, assign the Exchange administrator role to Admin1.
- B. From the Exchange admin center, assign the Discovery Management admin role to Admin1.
- C. From the Azure Active Directory admin center, assign the Service administrator role to Admin1.
- D. From the Exchange admin center, assign the Recipient Management admin role to Admin1.

Correct Answer: B

QUESTION 15

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant. You create a label named CompanyConfidential in Microsoft Azure Information Protection.

You add CompanyConfidential to a global policy.

A user protects an email message by using CompanyConfidential and sends the label to several external recipients. The external recipients report that they cannot open the email message.

You need to ensure that the external recipients can open protected email messages sent to them.

Solution: You modify the content expiration settings of the label.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 16

Your company has a main office and a Microsoft 365 subscription.

You need to enforce Microsoft Azure Multi-Factor Authentication (MFA) by using conditional
