Vendor: Microsoft

Exam Code: PL-200

Exam Name: Microsoft Power Platform Functional Consultant

Version: Demo

QUESTION 1
You use Power BI Desktop to configure Power BI reports.

You need to create a canvas app that displays user account information and include the app in a Power BI report.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. From the Power Apps Insert menu, add a Power BI tile
B. From the Power BI Desktop menu, insert a Power Apps visual and include the required fields in the Power Apps data
C. Publish the report to the Power BI service
D. Connect to Common Data Service from Power BI Desktop

Correct Answer: BCD

QUESTION 2
On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record.

You need to find the Note record.

Solution: Use Relevance Search to search for the word run.

Does the solution meet the goal?

A. Yes
B. No

Correct Answer: A

QUESTION 3
You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.

The company does not have any Office 365 application integrations enabled.

You need to recommend a storage solution that keeps storage costs low.

Solution: Enable server-based SharePoint integration.

Does the solution meet the goal?

A. Yes
B. No

Correct Answer: A
QUESTION 4

You plan on implementing complex business logic in Microsoft Dataverse tables by using Power Automate flows.

You realize that the functionality required to implement the business logic is not available in a Power Automate flow.

The new business logic must work in multiple Dataverse tables. In addition, the operation must return a value after it finishes and must be able to run from an existing Dataverse action.

You need to recommend the method to implement the missing logic.

What should you recommend?

A. Scheduled workflow
B. Bound action
C. Custom API
D. Unbound action

Correct Answer: D

QUESTION 5
You are creating Power BI reports for a company.

A company that has a model-driven app wants to use Power BI reports within the app. You create the reports.

You need to ensure that these reports are available within the app.

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Share the Power BI report to all users.
B. Add the Power BI report to the Site Map dashboards.
C. Create a PCF file.
D. Use the native reports in model-driven apps.
E. Add the Power BI report to a dashboard in the model-driven app.

Correct Answer: BE

QUESTION 6
You are a Dynamics Sales administrator for a car dealership. The dealership uses only out-of-the-box functionality. When a new car is sold, the salesperson uses a Word template to generate a letter from the quote to thank the customer.

You need to determine if you can revise the template.

Which Word template change can you make?

A. Add the Discount field conditionally.
B. Format the table to have alternating color rows.
C. Format the Created On field to a long date format.
D. Add the address of the customer.

Correct Answer: D

QUESTION 7
Your organization does not permit the use of custom code for solutions.

You need to create a view that can be viewed by all users in an organization.

Where should you create the view?

A. Microsoft Visual Studio
B. Maker portal
C. Advanced Find
D. System Settings

Correct Answer: C

QUESTION 8
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.

After marriage, Elisabeth changes her legal name to Elisabeth Mueller.

You need to update the sign in name for the user without losing any application history.

Solution: Change Elizabeth's username in the user record for the app.

Does the solution meet the goal?

A. Yes
B. No

Correct Answer: A

QUESTION 9
You create a report by using Power BI Desktop and a Power BI dataset that is connected to Azure SQL Database.

Multiple groups of employees will use the report.

You need to ensure that each group of employees can see only data that pertains to their group.

What should you do?

A. Create and assign file security profiles.
B. Create and assign Common Data Service security roles.
C. Create and assign roles by using row-level security.

Correct Answer: C

QUESTION 10
A company is developing several Power Virtual Agents chatbots. The company manufactures more than 1,000 different products.

The chatbots must prompt users to enter or select a product.

You need to store the model information so that it can be reused across all chatbots.

Where should you store the model data?

A. Global variables
B. Custom entities
C. Topics
D. Multiple choice options

Correct Answer: A

QUESTION 11
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers.

The chatbot must determine the group a customer belongs to based on their age. The age groups are:

▪ 0 - 17
▪ 18 - 25
▪ 26 - 35
▪ 36 - 55
▪ 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group.

Solution: Create a custom Age group entity and synonyms for each individual age in the corresponding item.
Use Age group for Identify in the question.

Does this meet the goal?
