

Vendor: EMC

Exam Code: E20-002

Exam Name: Cloud Infrastructure and Services Exam

Version: DEMO

QUESTION 1

Which method is used to create a linked clone of a virtual machine (VM)?

- A. Using a snapshot of the source VM
- B. Using a template of the source VM
- C. Sharing the network identity with the source VM
- D. Making a separate copy of the source VM virtual disk

Answer: A

QUESTION 2

Which tool can be used for live migration of virtual machine disk files between two EMC CLARiiON arrays?

- A. VMware Storage vMotion
- B. VMware HA
- C. VMware vMotion
- D. VMware FT

Answer: A

QUESTION 3

Which functionality is provided by a Virtual Machine File System when virtual machines are running on clustered servers?

- A. Pool of running virtual machines to be shared among hypervisors
- B. Pool of virtual disks to be shared among running virtual machines
- C. Automated locking of virtual machine files
- D. Virtual machine namespace resolution

Answer: C

QUESTION 4

Which virtual machine technique provides zero downtime in case of a virtual machine failure?

- A. Fault tolerance
- B. Clone
- C. Snapshot
- D. Backup

Answer: A

QUESTION 5

Which Cloud service model allows the user to run any operating system and application?

- A. Platform-as-a-Service
- B. Infrastructure-as-a-Service
- C. Software-as-a-Service
- D. IT-as-a-Service

Answer: B

QUESTION 6

Which Cloud service model is most appropriate for application development?

- A. Infrastructure-as-a-Service
- B. Platform-as-a-Service
- C. Software-as-a-Service
- D. IT-as-a-Service

Answer: B

QUESTION 7

An organization runs a proprietary operating system for its custom applications. System performance has been declining at an increasing rate. They would like to leverage a Cloud solution to address their problem.

Which Cloud service model would be appropriate for them?

- A. Infrastructure-as-a-Service
- B. Platform-as-a-Service
- C. Software-as-a-Service
- D. IT-as-a-Service

Answer: A

QUESTION 8

Which problem is addressed by RAID technologies?

- A. Data corruption
- B. Data backup
- C. Data loss
- D. Data security

Answer: C

QUESTION 9

Which is a benefit of server clustering?

- A. High CPU utilization
- B. High availability
- C. High memory utilization
- D. High security

Answer: B

QUESTION 10

Which RAID type uses parity to protect against data loss?

- A. RAID 3
- B. RAID 0
- C. RAID 1
- D. Nested

Answer: A
