

**Vendor:** HP

**Exam Code:** HP0-D13

**Exam Name:** Technical Introduction to the HP Enterprise  
Portfolio

**Version:** DEMO

1.What does HP Continuous Access EVA provide?

- A. highly available data
- B. highly available applications
- C. disaster tolerance without the need for additional hardware
- D. fast processing of I/O between geographically separated sites

**Answer: A**

2.What are features of Data Protector Express.? (Select two.)

- A. D2Any2Any automated copy
- B. fast backups of mission-critical data in large enterprises
- C. parallel data streams
- D. libraries that are dynamically shared among multiple clients
- E. upgradability to Data Protector

**Answer: A,C**

3.You are dividing a group of physical servers into multiple isolated virtual environments in order to reduce the impact of application upgrades in the environment. How should you configure the servers to simplify management?

- A. as clustered server nodes
- B. as multiple virtual servers running multiple operating systems
- C. as a host/guest configuration, with each guest running on a virtual imitation of the hardware layer
- D. as reusable pools of resources

**Answer: D**

4.What is the most cost-effective way to make SAN data stores accessible to LAN resources?

- A. pooling
- B. partitioning
- C. convergence
- D. integration

**Answer: C**

5.Which HP Networking switch series runs on a single operating system from core to edge?

- A. A
- B. E
- C. S
- D. V

**Answer: A**

6.What are key reasons for WAN-related outages and degradations? (Select two.)

- A. inadequate bandwidth
- B. disparate communications systems

- C. mis-configuration
- D. high latency
- E. security vulnerabilities

**Answer:** A,D

7.Which HP product provides server administrators with the simplest, most flexible way to connect servers and virtual machines to any LAN or SAN?

- A. SAN Virtualization Services Platform
- B. P4000 Virtual SAN Appliance Software
- C. Integrity Virtual Machine Manager
- D. Virtual Connect FlexFabric Module

**Answer:** D

8.Which enterprise goals have the greatest IT business value? (Select two.)

- A. reduce time to market
- B. improve customer service
- C. reduce reliance on service-level agreements
- D. enhance partner relationships
- E. improve access to information

**Answer:** A,E
