VMware

Exam VCAC510

VMware CertifiedAssociate–Cloud (VCA-Cloud)

Version: 8.1

[Total Questions: 145]

Question No : 1

Your manager wants you to setup a more dynamic set of alarms, more responsive to the workload changes in the cloud environment. To accomplish this, which of the following vCenter Operations Manager alarms features would you use?

A. Self-Adjusting Alerts
B. Dynamic Alerts
C. Dynamic Thresholds
D. Smart Alerts

Answer: D
Reference: http://www.vmware.com/files/pdf/vcenter/VMware-vCenter-Operations-DS-EN.pdf (Search for smart alerts)

Question No : 2

Your company has decided to use server, storage and network equipment from a cloud provider where you have the ability to configure the services and virtual machines in this environment to best accomplish your business goals. Which type of service are you using?

A. Infrastructure as a Service (IaaS)
B. Data Processing as a Service (DPaaS)
C. Platform as a Service (PaaS)
D. Software as a Service (SaaS)

Answer: A
Reference: http://searchcloudcomputing.techtarget.com/definition/Infrastructure-as-a-Service-IaaS

Question No : 3

Your manager wants a technical solution which will allow users access to the company's private cloud where the VMs they create are tightly controlled and the deployment process is streamlined. How would you advise your manager to solve this problem?

A. Use vCenter Orchestrator to set up a deployment workflow
B. Use vCloud Connector to move the VMs into the private cloud
C. Use vCloud Automation Center to set up a deployment portal
D. Use vCenter Operations Suite to deploy VMs

Answer: C

Reference: http://pubs.vmware.com/vsphere-51/topic/com.vmware.ICbase/PDF/vcenter-orchestrator-51-install-config-guide.pdf (page 11)

Question No : 4

You work in a large enterprise environment where provisioning VMs and vApp Templates is a relatively frequent operation. The provisioning operation is taking longer than you'd like and you are looking for ways to speed it up across the entire enterprise. What vCloud Director feature will reduce deployment time for VMs and vApp Templates in your enterprise cloud?

A. vSphere APIs for Array Integration (VAAI)
B. Storage vMotion
C. Fast Provisioning
D. Storage I/O Control

Answer: C

Reference: http://blogs.vmware.com/vsphere/2011/11/linked-clones-part-1-fast-provisioning-in-vcloud-director-15.html

Question No : 5

An administrator is considering a private cloud solution. The existing environment contains a number of print servers and a systems monitoring server. These applications are considered which type of workload?

A. Elastic
B. Infrastructure
C. Transient

D. Management

Answer: B

Question No : 6

Your organization has decided to use a hybrid cloud. During the weekly staff meeting, a colleague asks why the decision to use a hybrid cloud was made. Which scenarios best show the use case for a hybrid cloud? (Choose two.)

A. You are a small company and do not want to deal with your own datacenter and equipment
B. You want to periodically offload high demand development test cycles
C. You want to occasionally move data between different corporate private clouds
D. You have a mixture of physical and virtual servers

Answer: A,B

Question No : 7

Your manager, although not a network expert, knows the network group has informed her that your current company infrastructure is nearly out of VLANs for deploying additional networks. You are already growing to the point where this is going to soon become a serious issue. How would you explain to your manager how vCloud Networking and Security (vCNS) solves this problem?

A. vCNS uses specialized network hardware to extend the network capabilities in vCenter
B. vCNS extends vCenter Standard Switches to support VXLANs
C. vCNS uses virtual appliances to build software defined networks
D. vCNS increases the maximum number of supported VLANs

Answer: C
Reference: https://www.vmware.com/files/pdf/products/vcns/vmware-vcloud-networking-and-security-overview.pdf (page 3, architecture)

Question No : 8

You have been asked to give a high-level technical presentation outlining your company's new cloud project. During the question and answer session, one of the attendees asks you: "What is a Provider vDC?" What do you tell them?

A. A Provider vDC is the environment where virtual machines are stored, deployed and operated.
B. A Provider vDC represents a pool of resources, defined for a particular SLA.
C. A Provider vDC is a subset of an Org vDC.
D. A Provider vDC is composed of resources from multiple vCenter servers.

Answer: B

Explanation: http://frankdenneman.nl/2010/09/24/provider-vdc-cluster-or-resource-pool/

Question No : 9

Your manager asks you if your internal workload provisioning and management tools can be used to manage and interoperate with your public cloud provider. You answer yes, by using which of the following vCloud features?

A. Provider vDC
B. Self-Service Portal
C. Service Catalog
D. vCloud APIs

Answer: D
Reference: http://cloud.idglabs.net/?p=1874

Question No : 10

Your company is migrating to a private cloud and currently has a combination of legacy physical servers, vCenter (e.g. non-cloud) VMs and cloud-based VMs. Rather than having to deal with three separate interfaces for deployment and lifecycle management, which product can you use during the transition period?

A. vFabric Suite

B. vCloud Connector
C. vCenter Server
D. vCloud Automation Center

Answer: B

Question No : 11

You work at a small, but rapidly expanding chain of retail stores. You have a private cloud in place which works well most of the year, but to manage the annual holiday peak load on your Internet store, you have decided to utilize a hybrid cloud as needed. Which two components are required when deploying a hybrid cloud environment? (Choose two.)

A. vFabric Hyperic
B. vCloud Connector
C. vCenter Operations Management Suite
D. vCloud Director

Answer: B,D
Reference:
http://download3.vmware.com/vcloud_assets/Doc/PDF/MovingCloudWorkloads-vCC.pdf

Question No : 12

Your manager wants you to make sure your cloud environment is performing well and is not exhibiting any serious problems. Which vCenter Operations Manager Super Metric do you use to help analyze workload, anomalies and faults?

A. Health
B. Status
C. Risk
D. Performance

Answer: A
Reference: http://blogs.vmware.com/management/2012/01/vmware-vcenter-operations-management-suite-50-now-available.html (see the bulleted point under the image)

Question No : 13

Your development team is using pre-configured and deployed web, database, and application servers installed as virtual machines in your company cloud. Which type of service are they using?

A. Software as a Service (SaaS)
B. Platform as a Service (PaaS)
C. Data Processing as a Service (DPaaS)
D. Infrastructure as a Service (IaaS)

Answer: B
Reference: http://docs.hol.vmware.com/HOL-2013/HOL-SDC-1314_html_en/

Question No : 14

Management at your company has asked you to give a presentation outlining why you want to move to a private cloud. As part of this presentation you are explaining vCloud Director and its capabilities. Which of the following describes something vCloud Director can do for your cloud project?

A. Provide Fault Tolerance (FT) protection for your cloud workloads
B. Move workloads between a private and a public cloud
C. Allow multiple tenants to run on the same vSphere Cluster
D. Move your cloud to a remote site when disaster strikes

Answer: C
Reference: http://www.vmware.com/files/pdf/VMware-Architecting-vCloud-WP.pdf (page 15, vcloud director constructs)

Question No : 15

Your manager is concerned that, even in the cloud, provisioning hundreds or thousands of VMs will result in a lot of redundant storage use. You explain that you can minimize the use of redundant storage with vCloud by making use of which of the following features?

A. Snapshots
B. Fast Provisioning
C. Templates
D. Storage DRS

Answer: B

Reference: http://www.vmware.com/files/pdf/VMware-Architecting-vCloud-WP.pdf

Question No : 16

You manager wants to utilize the platform capabilities of a VMware partner application in order to automate the delivery of network services in your environment. Which extensibility feature can provide this functionality?

A. vCenter Hyperic
B. vCenter Server
C. vCloud Automation Center Server Catalog
D. VMware NSX API

Answer: D

Question No : 17

You have been asked to install and verify network security for the multiple tenants in your public cloud. Which of the following will you primarily work with to secure your tenants?

A. vCloud Networking and Security
B. vSphere Distributed Switch
C. vShield Zones
D. vCloud Security Server

Answer: A

Reference: https://www.vmware.com/files/pdf/products/vcns/vmware-vcloud-networking-

and-security-overview.pdf (page 2)z

Question No : 18

You have installed and configured Site Recovery Manager (SRM) to protect your private cloud infrastructure. Your manager wants assurances that the plan you have put in place will actually work. How would you go about testing your Site Recovery Manager setup?

A. Tell SRM to initiate an HA failover test.
B. Execute a non-disruptive SRM recovery test.
C. Tell SRM's to simulate moving your workloads using vCloud Connector.
D. Tell SRM to vMotion protected VMs to the recovery site.

Answer: B
Reference: http://info.vmware.com/content/enterprise-NA-vcentersiterecovery-17668 (See non disruptive testing)

Question No : 19

A potential customer asks you to explain the benefits of using VMware NSX versus another vendor and product that utilizes physical networking infrastructure.

Which two benefits of implementing VMware NSX would you include in your answer? (Choose two.)

A. No more physical switches
B. Reduced network provisioning time
C. Non-disruptive server hardware upgrades
D. Non-disruptive deployment

Answer: B,D

Question No : 20

At your company you have several research projects which require separate networks in your cloud. Although the servers on these networks will require access to the rest of the company, it is not required that any of the servers deployed on these networks have static or public IP addresses. Which vCloud Networking and Security feature will allow you to reuse the same subnet/IP address range on each of these networks without causing any IP address conflicts or collisions?

A. NAT
B. Fencing
C. Firewall
D. VPN

Answer: A

Question No : 21

Your manager has been wondering why, in a cloud-based virtual environment, you cannot continue to use the traditional management tools you have been using before you transitioned to the cloud. How would you explain to your manager why you need to use a management tool like vCenter Operations Manager?

A. All management functions in the cloud must run on a vCenter server as vCenter is where performance data is collected
B. Traditional network management software cannot capture virtual network packets for analysis
C. Virtual environments use resources differently than pure physical environments
D. Management agents written for physical environments will not work in virtual machines

Answer: C

Question No : 22

You are asked to explain to your company's technical staff the vCloud feature used to logically group users and resources so that each department can have its own virtual datacenter. Which of the following are you describing to your staff?

A. Organizations
B. Clusters
C. Folders

D. Pods

Answer: A
Reference: http://www.vmware.com/files/pdf/VMware-Architecting-vCloud-WP.pdf

Question No : 23

Your development group tells you they are having problems with a specific application, but only when it's running on Ubuntu. It works fine on all other operating systems. Which product will best address this issue?

A. vCloud Connector
B. vFabric Hyperic
C. vFabric Application Director
D. vCenter Server

Answer: B

Question No : 24

You need to perform performance, capacity and configuration management of your newly installed cloud. Which of the following products will best help you accomplish this?

A. vCloud Director
B. vFabric Hyperic
C. vCenter Server
D. vCenter Operations Manager

Answer: D
Reference: http://www.vmware.com/uk/products/vcenter-operations-management/features.html

Question No : 25

You will be deploying a new vCloud vApp which needs storage with specific capabilities. In the past, this had been accomplished by manually assigning your datastores to a service level such as "Tier 1," "Tier 2," and so on. Your SAN infrastructure is large and complicated enough that you do not want to do this manually as it is tedious and error prone. What technology helps eliminate a lot of the manual work involved in defining tiered storage used in your cloud?

A. Catalogs
B. Resource Pools
C. VASA
D. Storage vMotion

Answer: C

Question No : 26

Management has decided they want a better understanding of the typical workloads in your environment and what cost savings might be realized due to underused equipment. Which of the following components would you use to help determine your normal cloud workload and how underutilized your current equipment is?

A. vFabric Hyperic
B. vCloud Connector
C. vCenter Operations Manager
D. vCloud Director

Answer: C
Reference: http://www.vmware.com/support/vcops/doc/vcops-57-vapp-release-notes.html

Question No : 27

Your management has decided to take advantage of a public cloud infrastructure. You have selected a VMware public cloud partner and are ready to begin the move.

Which product or component will you use to move all of your vApps to the public cloud?

A. vCenter Orchestrator

B. vCenter Server
C. Site Recovery Manager
D. vCloud Connector

Answer: D

Question No : 28

Management is concerned with the rising costs of running services in your private cloud. You need to compare your costs to similar offerings from other public cloud providers so that you can gauge if you are remaining competitive.

Which product is best for this task?

A. VMware NSX
B. IT Business Management
C. vCenter Orchestrator
D. vCenter Server

Answer: B

Question No : 29

You have been tasked with automating the recurring deployment of a multi-tier application with varying virtual hardware requirements. Which vFabric feature will you use to create a deployment plan which can be reused?

A. Blueprint
B. Road Map
C. Deployment Guide
D. App Template

Answer: A
Reference:
http://pubs.vmware.com/vfabric52/index.jsp?topic=/com.vmware.vfabric.appdirector.1.0/appdirector.html (5th bullet)

Question No : 30

You're concerned a physical host outage will impact running VMs in your cloud environment. Which of the following vSphere features will help recover from a failed ESXi host?

A. vSphere High Availability
B. vMotion
C. Storage vMotion
D. Distributed Resource Scheduler

Answer: A
Reference: http://pubs.vmware.com/vsphere-51/topic/com.vmware.ICbase/PDF/vsphere-esxi-vcenter-server-51-availability-guide.pdf (page 9, see drs and vmotion integration, last sentence)

Question No : 31

You would like to stretch your private cloud network to the public cloud. Which product will allow you to do this?

A. vFabric Suite Standard Edition
B. vCloud Connector Core Edition
C. vCloud Connector Advanced Edition
D. vFabric Suite Advanced Edition

Answer: C
Reference: http://www.vmware.com/products/vcloud-connector/

Question No : 32

Your manager asks you to set up your company's private cloud so that you can provide various compute and storage service level offerings. What component in vCloud Director

would you configure to provide the different service level offerings?

A. Storage Clusters
B. vCenter Resource Pools
C. Provider vDC
D. Org vDC

Answer: C
Reference: http://pubs.vmware.com/vcd-51/topic/com.vmware.vcloud.api.doc_51/GUID-6DA11728-5405-4554-BEFD-81E8F4D80161.html

Question No : 33

Your manager heard on a webinar that vCenter Operations Manager has the ability to create custom groups so that he could better align performance and management decisions with the business. Which two custom groups could you create? (Choose two.)

A. DRS/HA Cluster
B. Application
C. vCenter Datacenter
D. Line of business

Answer: B,D
Reference: http://www.vmware.com/pdf/vcops-56-getting-started-guide.pdf

Question No : 34

Management has decided it makes business sense for your company to move to a hybrid cloud environment but has the concern that once you have made the move, managing your many VMs across the various clouds will require multiple logins with multiple interfaces. Which product would you describe to management to reassure them that you have a single pane of glass style operational interface for all of the VMs in this hybrid cloud environment?

A. vCenter Server
B. vCloud Connector

C. vCloud Director
D. vFabric Suite

Answer: B

Reference: http://www.informationweek.com/cloud-computing/infrastructure/vmware-offers-hybrid-cloud-management-co/229203097

Question No : 35

You are deploying a new vApp which needs specific storage capabilities. In the past, you manually assigned your datastores to a service level such as "Tier 1 FC", "Tier 2 SAS", etc." Your storage infrastructure has grown very large and it has become tedious and error prone manually identifying the various storage types and capabilities.

Which technology helps eliminate a lot of the manual work involved in keeping your storage information up to date within your cloud?

A. VASA
B. Resource Pools
C. Storage vMotion
D. Catalogs

Answer: A

Question No : 36

Management has decided that it makes business sense for your company to move to a hybrid cloud environment. They are concerned, however, that this may increase complexity by requiring multiple logins into multiple interfaces.

Which product should your present to management to allow a single pane of glass operations interface for all VMs within the hybrid cloud environment?

A. vCloud Connector
B. VMware NSX
C. vFabric Suite
D. vCenter Server

Answer: A

Question No : 37

You need a solution that allows moving some of your datacenter's workload to a public cloud during peak hours. You do not want to pay for unused capacity during non-peak hours. Which vCloud product will solve this problem?

A. vCloud Automation Center
B. VMware NSX
C. vCloud Connector
D. vCloud APIs

Answer: C

Question No : 38

Your consulting firm has asked you to advise a large enterprise client which has not yet moved to a cloud infrastructure. This client is running the majority of their servers in a virtualized vSphere environment and, initially, wants to know why they should deploy a private cloud.

Which of the following would be a compelling reason for the client to make the jump to the cloud?

A. Simplified provisioning of workloads
B. vCloud Director will allow them to leverage vNetwork Distributed Switches
C. They will be able to place their mission-critical VMs under FT protection
D. They will be able to use storage clusters and Storage DRS

Answer: A
Reference:
http://blogs.computerworld.com/19350/talking_about_the_benefits_of_cloud_computing

Question No : 39

You have been tasked with setting up various automation features in your private cloud. You know that vCloud Automation Center is going to be the perfect tool for the job. What are the available purchase options for vCloud Automation Center?

A. It is available with vSphere or vCloud Enterprise.
B. It is available on a stand-alone basis or with vCloud Enterprise.
C. It is only available on a stand-alone basis.
D. It is only available with vCloud Enterprise.

Answer: B

Reference: http://www.vmware.com/in/products/vcloud-automation-center/pricing.html

Question No : 40

You have been put in charge of configuring several new vApps in your private cloud. Your company's security policy dictates users on one project not see the IP addresses used on another project. Which vCloud Networking and Security feature would you setup to configure this required IP address isolation?

A. VXLAN
B. VPN
C. Firewall
D. NAT

Answer: A

Reference: http://www.vmware.com/files/pdf/techpaper/VMware-VXLAN-Deployment-Guide.pdf

Question No : 41

While giving a technical presentation on cloud concepts and components, you are asked to define the Sortware-Defined Enterprise. How do you respond?

A. The Sortware-Defined Enterprise is an architectural approach that uses virtualization to replace all physical components in the data center whilst using local management and

compliance to deliver infrastructure and Software-as-a-Service components.

B. The Sortware-Defined Enterprise is an architecture framework designed to fully automate all IT services in all data centers removing the need for human interaction.

C. The Sortware-Defined Enterprise is an architecture that uses intelligence, automation and common management to provide transparent governance of infrastructure and Software-as-a-Service components.

D. The Sortware-Defined Enterprise is an Enterprise response to mainstream disorganization of resources in the datacenter that delivers on the promise of interconnected infrastructure and Software-as-a-service.

Answer: C

Question No : 42

You have Site Recovery Manager (SRM) in place to protect critical vCloud servers in the event of a disaster. Over lunch, a manager asks you why SRM is configured to protect only the vCloud servers and not the actual department workload VMs. What do you tell her?

A. The workload VMs are on fenced networks, which can't be failed over.

B. SRM can't fail over the workload VMs, but it is a simple matter to restart them once the vCloud servers have failed over.

C. Workload VM failover is implied when you failover the vCloud infrastructure servers.

D. vCloud workloads can be migrated with vCloud Director once it has failed over and so are not required to be protected with SRM.

Answer: C
Reference: http://www.yellow-bricks.com/2012/02/13/vcloud-director-infrastructure-resiliency-solution/

Question No : 43

Your manager wants an explanation of why your company should move to a Software-Defined Data Center architecture. As part of this presentation, you are describing policy-driven automation.

Which components are enabled by policy-driven automation?

A. Storage, Compute, Network, and Security

B. Storage, Compute, Network, and Governance
C. Security, Compute, and Management
D. Storage, Compute, and Management

Answer: A

Question No : 44

An administrator is considering a private cloud solution. The solution must allow for a 3 tiered service model for development servers, application servers and business critical servers. What component of a VMware private cloud solution can be used to meet this requirement?

A. Organizations
B. Service Catalogs
C. Virtual Datacenters
D. Allocation Models

Answer: B
Reference: http://www.vmware.com/files/pdf/services/VMware-On-Demand-Services-Whitepaper.pdf (page 3, on-demand services)

Question No : 45

As a consultant at a public cloud provider, you must provide a way of delivering services through a user interface that:

    ✎ is specific to the user who logs in.
    ✎ delivers services that adhere to the specific Service Level Agreement of that
       customer.
Which cloud product best meets your requirements?

A. vCloud Automation Center Advanced Service Designer
B. vSphere Web Client
C. vCenter Orchestrator
D. vCloud Automation Center Self Service Catalog

Answer: A

Question No : 46

You manage a complex environment consisting of several hundred virtual machines running on vSphere ESXi 5.5 and 50 physical servers running applications.

Which solution will allow you to most easily virtualize the physical servers locally while moving your existing virtual machines off-site to a cloud service provider, where they will be protected against failure?

A. vCenter Orchestrator
B. vCloud Hybrid Service
C. vCloud Automation Center
D. vCenter Server

Answer: B

Question No : 47

Before you begin the rollout of your private cloud, the technical project leader wants to ensure you have the vSphere components required by vCloud Director in place first. Which two vSphere components are required by vCloud? (Choose two.)

A. ESXi hypervisor
B. vCenter Server
C. vSphere Data Protection
D. vCenter Orchestrator

Answer: A,B
Reference: http://pubs.vmware.com/vcd-51/index.jsp?topic=%2Fcom.vmware.vcloud.install.doc_51%2FGUID-C258BED7-9664-4DFE-B812-100281D4D460.html
